

# PRAGMA 37

September 11-14, 2019  
San Diego, California, USA

## Observations on PRAGMA Practices Reflections on Its History and Future

Peter Arzberger

# When You Think of PRAGMA

What are the first word(s) that come to mind?

# PRAGMA 37

September 11-14, 2019  
San Diego, California, USA

## Welcome to the University of California San Diego

- Scripps Institution of Oceanography – Founded 1905, Part of UC 1912
  - UCSD established 1960
- UCSD Library: Geisel Library – Named in honor of Audrey and Theodor Seuss Geisel
  - Architect: [William Pereira](#) (also designed the [Transamerica Pyramid](#))

# PRAGMA 37

September 11-14, 2019  
San Diego, California, USA

The Stuart Collection

<https://stuartcollection.ucsd.edu/>

seeks to enrich the cultural, intellectual, and scholarly life of the UCSD campus and of the San Diego community by building and maintaining a unique collection of site-specific works by leading artists of our time.

Falling Star, by **Do Ho Suh**, Open 11 am to 2 pm

Sun God by Niki de Saint Phalle  
She also has art in Fukuoka Japan

The Bear by Tim Hawkinson  
Build from local stones (just drive to Poway)

The Snake Path – Alex Smith

# Near Campus

Torrey Pines Glider Port

Scripps Coastal Reserve

Torrey Pines State Nature Reserve

La Jolla Trail

# PRAGMA Meetings in San Diego

- PRAGMA 1, March 11-12, 2002
- PRAGMA 7, September 15-17, 2004
- PRAGMA 18, March 3- 4, 2010
- PRAGMA 37, September 11-13, 2019

17.5 years  
37 workshops  
24 Different Hosts  
27 Different Locations

# When We Started PRAGMA in 2002

## What were we thinking?

### Remember the question I asked at the beginning?

- An opportunity to leverage investments in networking and interest in Grid
- Avoid compartmentalization community experienced with clusters
- Renewed interest in tackling global issues (in science) through collaboration

# So, What Did We Do?

## We ran a non-controlled experiment

- Held a series of Workshops (three initially)
- Seeded the speakers with individuals inclined to collaboration
- Gave homework between meetings
- Did not push any specific technology, but tried anything
- Followed through on our commitments
- Established a set of Operating Principles and Procedures (2003) and representative structure of decision making, and “managed, open growth”
- Highlighted successes through the PRAGMA Collaborative Overview
- Looked for new opportunities to make a difference
- Focused on people

# We Expanded Membership and Stayed Agile Mindful of Technology Trends (Grid, Virtualization, Data, Edge, Science)

- **2002 – 2005: Getting Started**
  - Established Operating Principles and Procedures (2003)
  - Grew Partnership
  - Launched PRIME (Osaka, NCHC, Monash, + more) and GLEON (built on NCHC activity)
- **2003 (PRAGMA 5 Hsinchu): “Make the Grid Usable”**
- **2009 (PRAGMA 17 Hanoi):** Panel shifting focus to virtualization
- **2012: NSF Renewal**
  - Expanded US participation to UF, IU, UW, VT, KU
  - Brought in expertise in SDN, Data, Lakes, Biodiversity
  - Launched two expeditions
- **2013 (PRAGMA 25 Beijing)**
  - Started PRAGMA ENT
- **2016: First Global CENTRA meeting in Taichung**
  - PRAGMA 32 with CENTRA 2 (Gainesville April 2017); PRAGMA 34 with CENTRA 3 (Tokyo May 2018), PRAGMA 36 with CENTRA 4 (JeJu, 2019)
- **2018 (PRAGMA 34 Tokyo):** First sighting of ABCI
- **2019 (PRAGMA 37 San Diego):** Panel of future directions

2007

# 2007: A Technology Inflection Point

- iPhone Announced
- Google launches android
- Amazon release Kindle
- Hadoop started
- Github – development started
- Facebook opened (Sept 2006)
- Twitter spun off as separate platform
- Airbnb conceived
- IBM Watson started
- Intel Introduces non-silicon materials (high-k/metal gates)
- Cost of DNA sequencing begins dramatic decline

**And the list goes on**

# So What Has PRAGMA Accomplished?

- Built a community of practice and trust
- Migrated our experiments into national infrastructure (e.g., Comet)
- Launched new projects
  - Many National Grid Projects
  - GLEON
  - CENTRA
  - PRIME
- Shifted technology approach
- Research Products\*: more than 26 software components
- Publications\*: 101 (self reported), 43 included students as co-authors
- Changed the conduct of a field of science
- Advanced understanding in several science areas

\* Since 2012

# When You Think of PRAGMA

What are the first word(s) that come to mind?

## When I think of PRAGMA ...

- Experiment, experimentation
- Trust
- Colleagues, friends, community
- Commitment, follow through
- Grass roots
- Sharing: resources, expertise, knowledge
- Evolution
- Learning about other cultures
- Core principles, evolving practices
- Tracking trends; adjusting
- Unique contributions
- Impact on science, technology and society
- Open to new ideas
- Students are our legacy
- Fun

**Pacific Rim, International**

**What are your words?**

If you want to go fast, go alone  
If you want to go far, go together

**Find Unique, Shared Challenges**  
**Pursue Them Collaboratively**  
**Change the World**

*“Unless someone like you cares a whole awful lot, nothing is going to get better. It's not.”*

# PRAGMA Operating Principles and Procedures (OPP)

- Established February 2003
- Living Document, revised 13 times (last Sept 2018) with Functional Area Roles (4)
  - Modeled in GBIFs charter, used by GLEON to establish their OPP

# Goals

- to enable users throughout the Pacific Rim to take advantage of grid technologies for the advancement of e-Science applications.
- to establish sustained collaborations and to advance the use of grid technologies in advanced scientific applications among a community of investigators working with leading institutions throughout the region and around the world.
- community of practice comprising individuals and institutions from around the Pacific Rim that actively collaborate with, and enable, small- to medium-sized groups to solve their problems with information technology.

- Some Principles  
(Understandings)

- International Forum
- Open to all institutions (aligned with our goals)
- Based on goodwill of all members
- Decisions ideally reached by consensus

- Some Practices (Activities)

- Encourage and conduct joint projects
- Share resources
- Conduct training
- Exchange researchers
- Communicate regularly
- Collaborate with related organizations
- Disseminate knowledge and proceedings from our meetings
- Raise resources

- Observations

- Active engagement of participants
  - Conducting projects or experiments
  - Sharing experiments
  - Testing software
- 
- Encouraging ideas from all
