

# Geoscience WG Report

- Whey-Fone, Kevin, Sornthep, and, two students
- Presentations:
  - Coastal and flood simulation
  - Natural Disaster Management Information Platform
  - Solar Energy Map Generator
- Collaboration: Big Data Handling and Visualization
  - Fast peta-scale data visualization for real-time and interactive applications
  - Trying out existing tools (e.g. ParaView, VisIt) and exchanging experiences
  - Sharing add-on developments
