

An MPI concept with efficient control of network functionality based on SDN

Shimojo Lab., Osaka University

**Khureltulga Dashdavaa, Munkhdorj Baatarsuren,
Keichi Takahashi, Yoshiyuki Kido, and Shinji Shimojo**

Message Passing Interface

- **Message Passing Interface (MPI) is important programming model since widely spread of cluster system in HPC.**

Cluster is parallel and distributed HPC architecture that uses a lot of low performance computers.

- **top500 HPC's 86.8% is cluster.**

- **However, MPI collective communication's overhead becomes problem as scale of cluster grows.**

Previous works

- SDN-MPI-Bcast achieves to boost MPI-Bcast up leveraging Software Defined Networking (SDN).
- sets multicast tree path from source to others.

- We achieve to boost up MPI-Allreduce and MPI-Reduce leveraging SDN.

Previous works

- SDN-MPI-Bcast achieves to boost MPI-Bcast up leveraging Software Defined Networking (SDN).
- sets multicast tree path from source to others.

- We achieve to boost up MPI-Allreduce and MPI-Reduce leveraging SDN.

Previous works

- SDN-MPI-Bcast achieves to boost MPI-Bcast up leveraging Software Defined Networking (SDN).
- sets multicast tree path from source to others.

- We achieve to boost up MPI-Allreduce and MPI-Reduce leveraging SDN.

Previous works

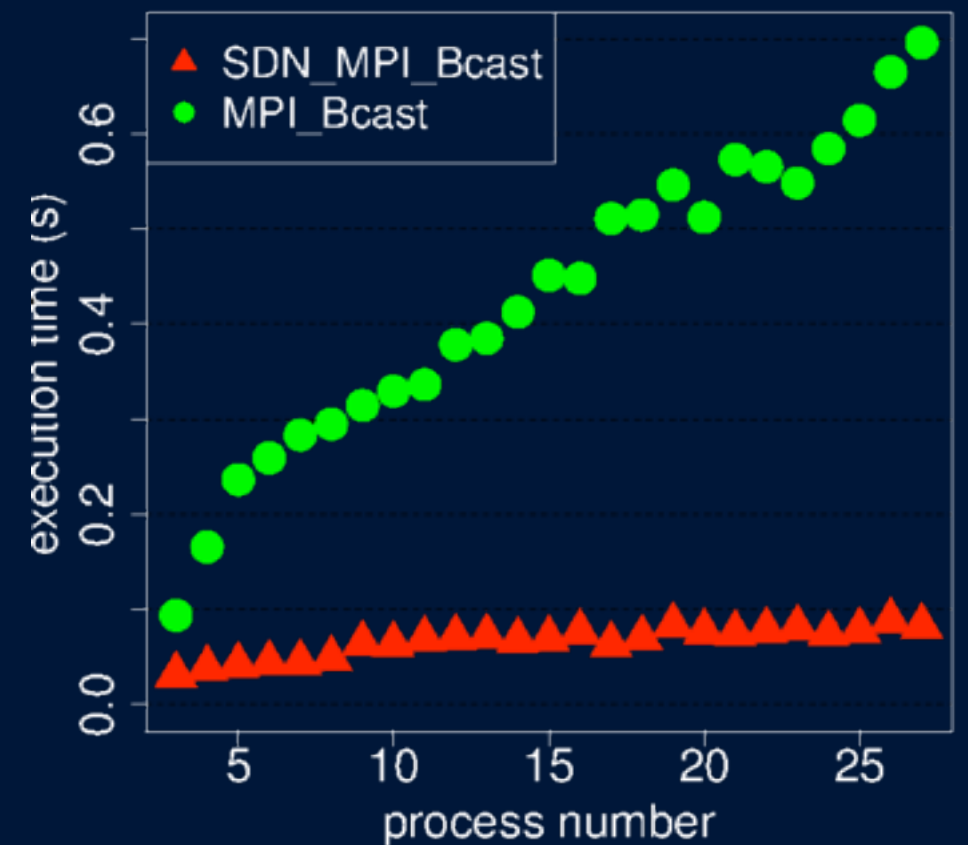

- SDN-MPI-Bcast achieves to boost MPI-Bcast up leveraging Software Defined Networking (SDN).
- sets multicast tree path from source to others.

- We achieve to boost up MPI-Allreduce and MPI-Reduce leveraging SDN.

Previous works

- SDN-MPI-Bcast achieves to boost MPI-Bcast up leveraging Software Defined Networking (SDN).
- sets multicast tree path from source to others.

- We achieve to boost up MPI-Allreduce and MPI-Reduce leveraging SDN.

Previous works

- SDN-MPI-Bcast achieves to boost MPI-Bcast up leveraging Software Defined Networking (SDN).
- sets multicast tree path from source to others.

Network controller

Duplicate

- We achieve to boost up MPI-Allreduce and MPI-Reduce leveraging SDN.

Previous works

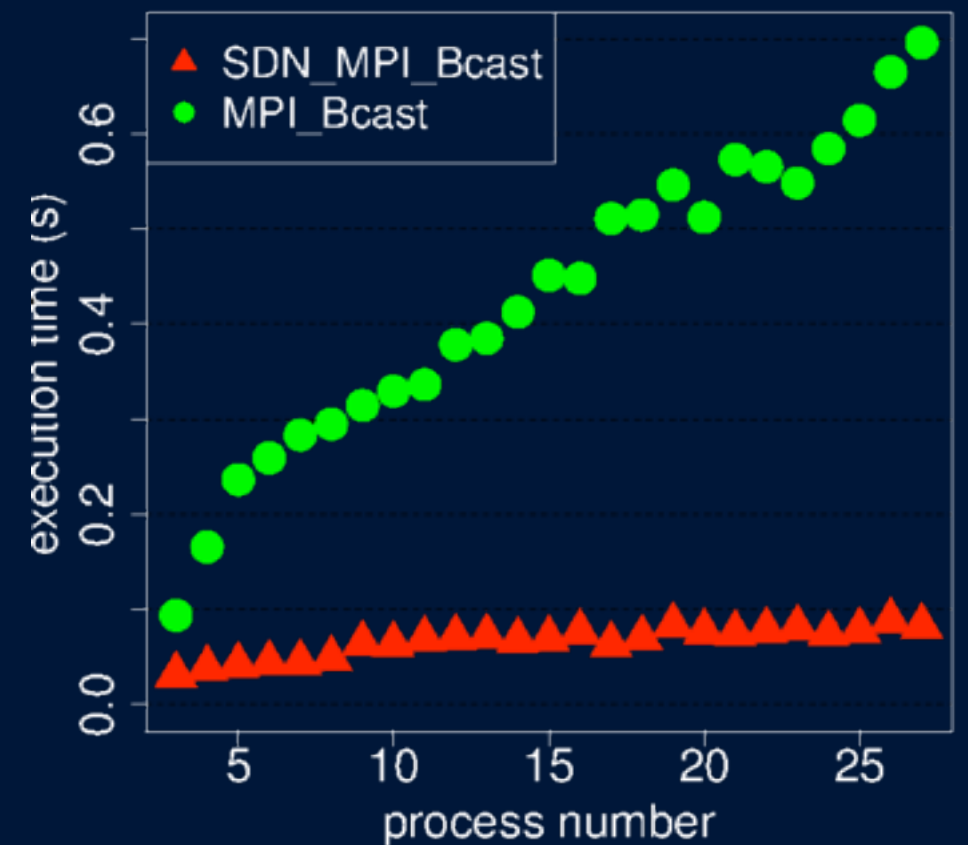

- SDN-MPI-Bcast achieves to boost MPI-Bcast up leveraging Software Defined Networking (SDN).
- sets multicast tree path from source to others.

- We achieve to boost up MPI-Allreduce and MPI-Reduce leveraging SDN.

Previous works

- SDN-MPI-Bcast achieves to boost MPI-Bcast up leveraging Software Defined Networking (SDN).
- sets multicast tree path from source to others.

- We achieve to boost up MPI-Allreduce and MPI-Reduce leveraging SDN.

Previous works

- SDN-MPI-Bcast achieves to boost MPI-Bcast up leveraging Software Defined Networking (SDN).
- sets multicast tree path from source to others.

- We achieve to boost up MPI-Allreduce and MPI-Reduce leveraging SDN.

Previous works

- SDN-MPI-Bcast achieves to boost MPI-Bcast up leveraging Software Defined Networking (SDN).
- sets multicast tree path from source to others.

- We achieve to boost up MPI-Allreduce and MPI-Reduce leveraging SDN.

Previous works

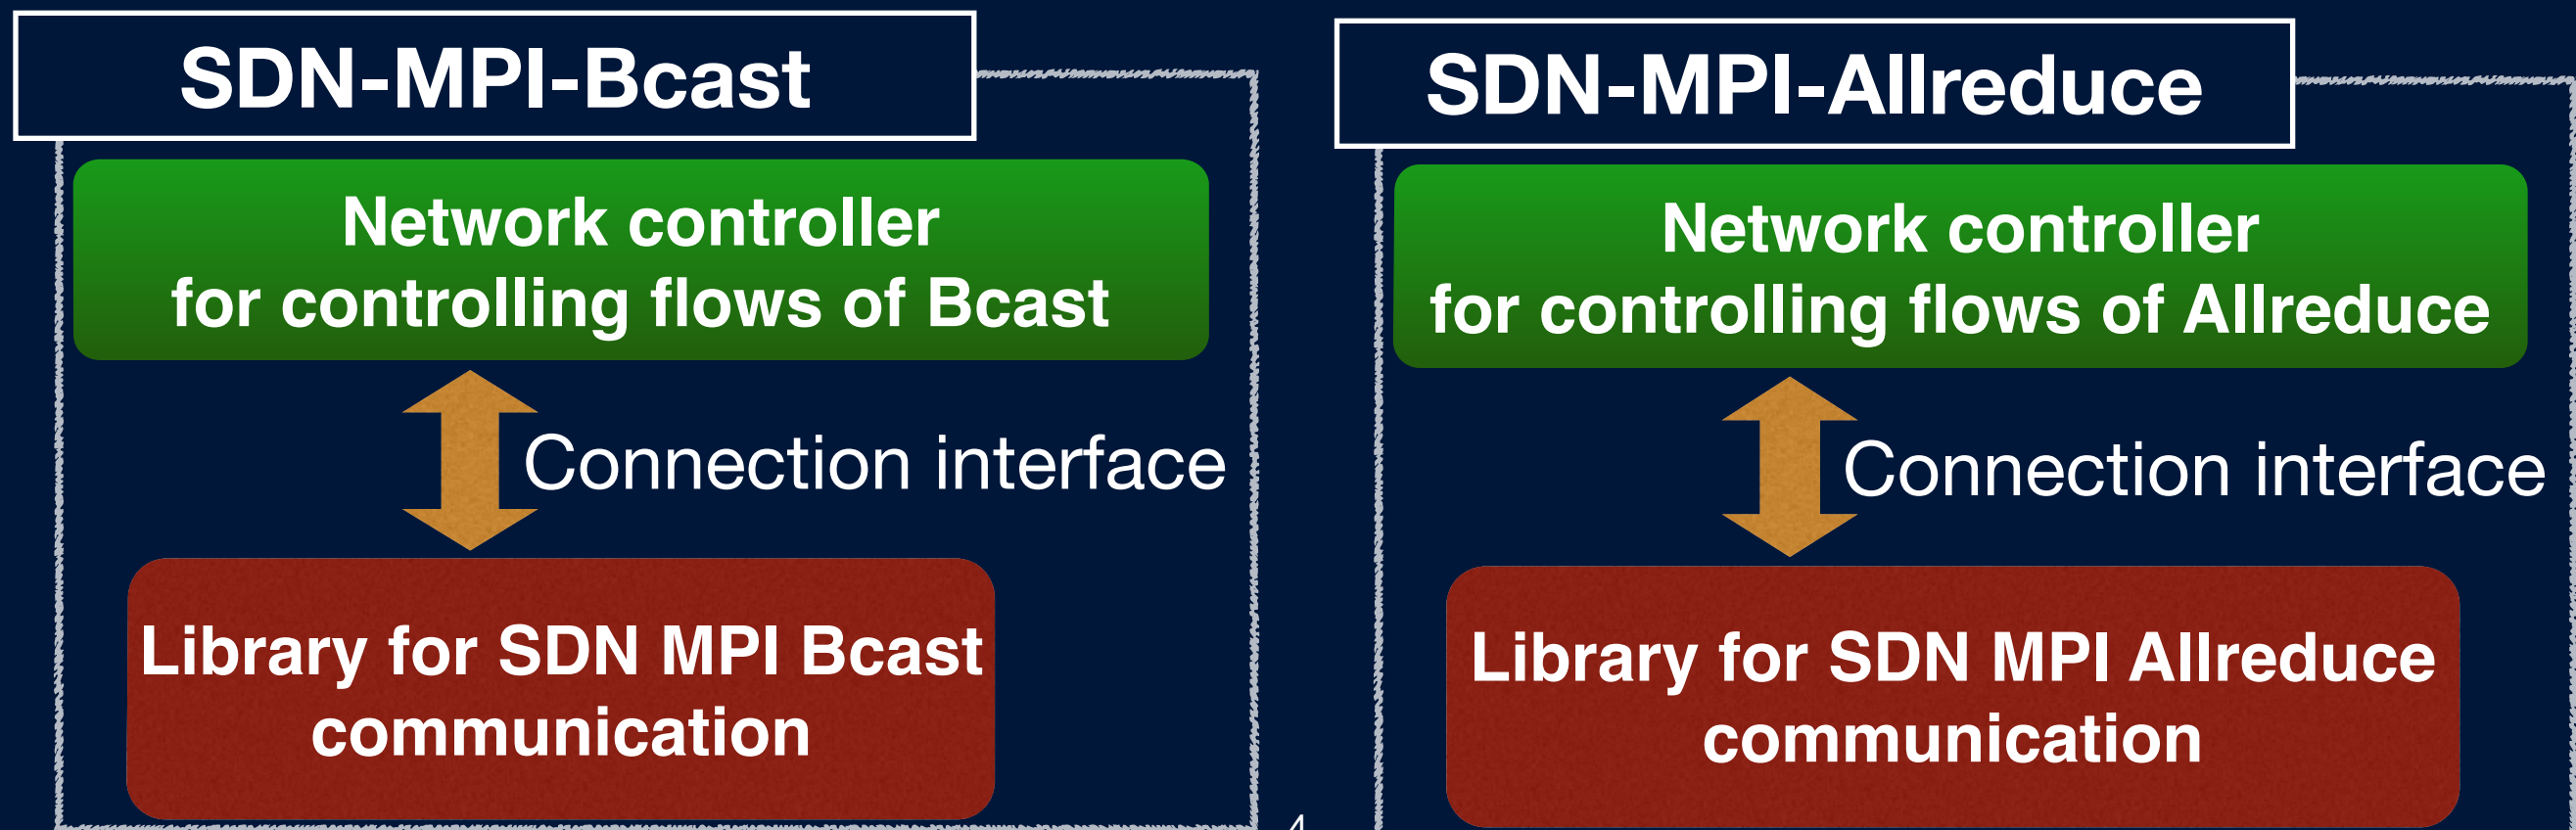

- SDN-MPI-Bcast achieves to boost MPI-Bcast up leveraging Software Defined Networking (SDN).
- sets multicast tree path from source to others.

- We achieve to boost up MPI-Allreduce and MPI-Reduce leveraging SDN.

Problem of previous works

- Efficient and extendable general SDN MPI framework does not exist.
- Each boosting methods are developed individually.
- Hard to include new boosting methods.

SDN MPI framework

- SDN MPI framework that includes previous work's methods and expendable for new boosting methods.

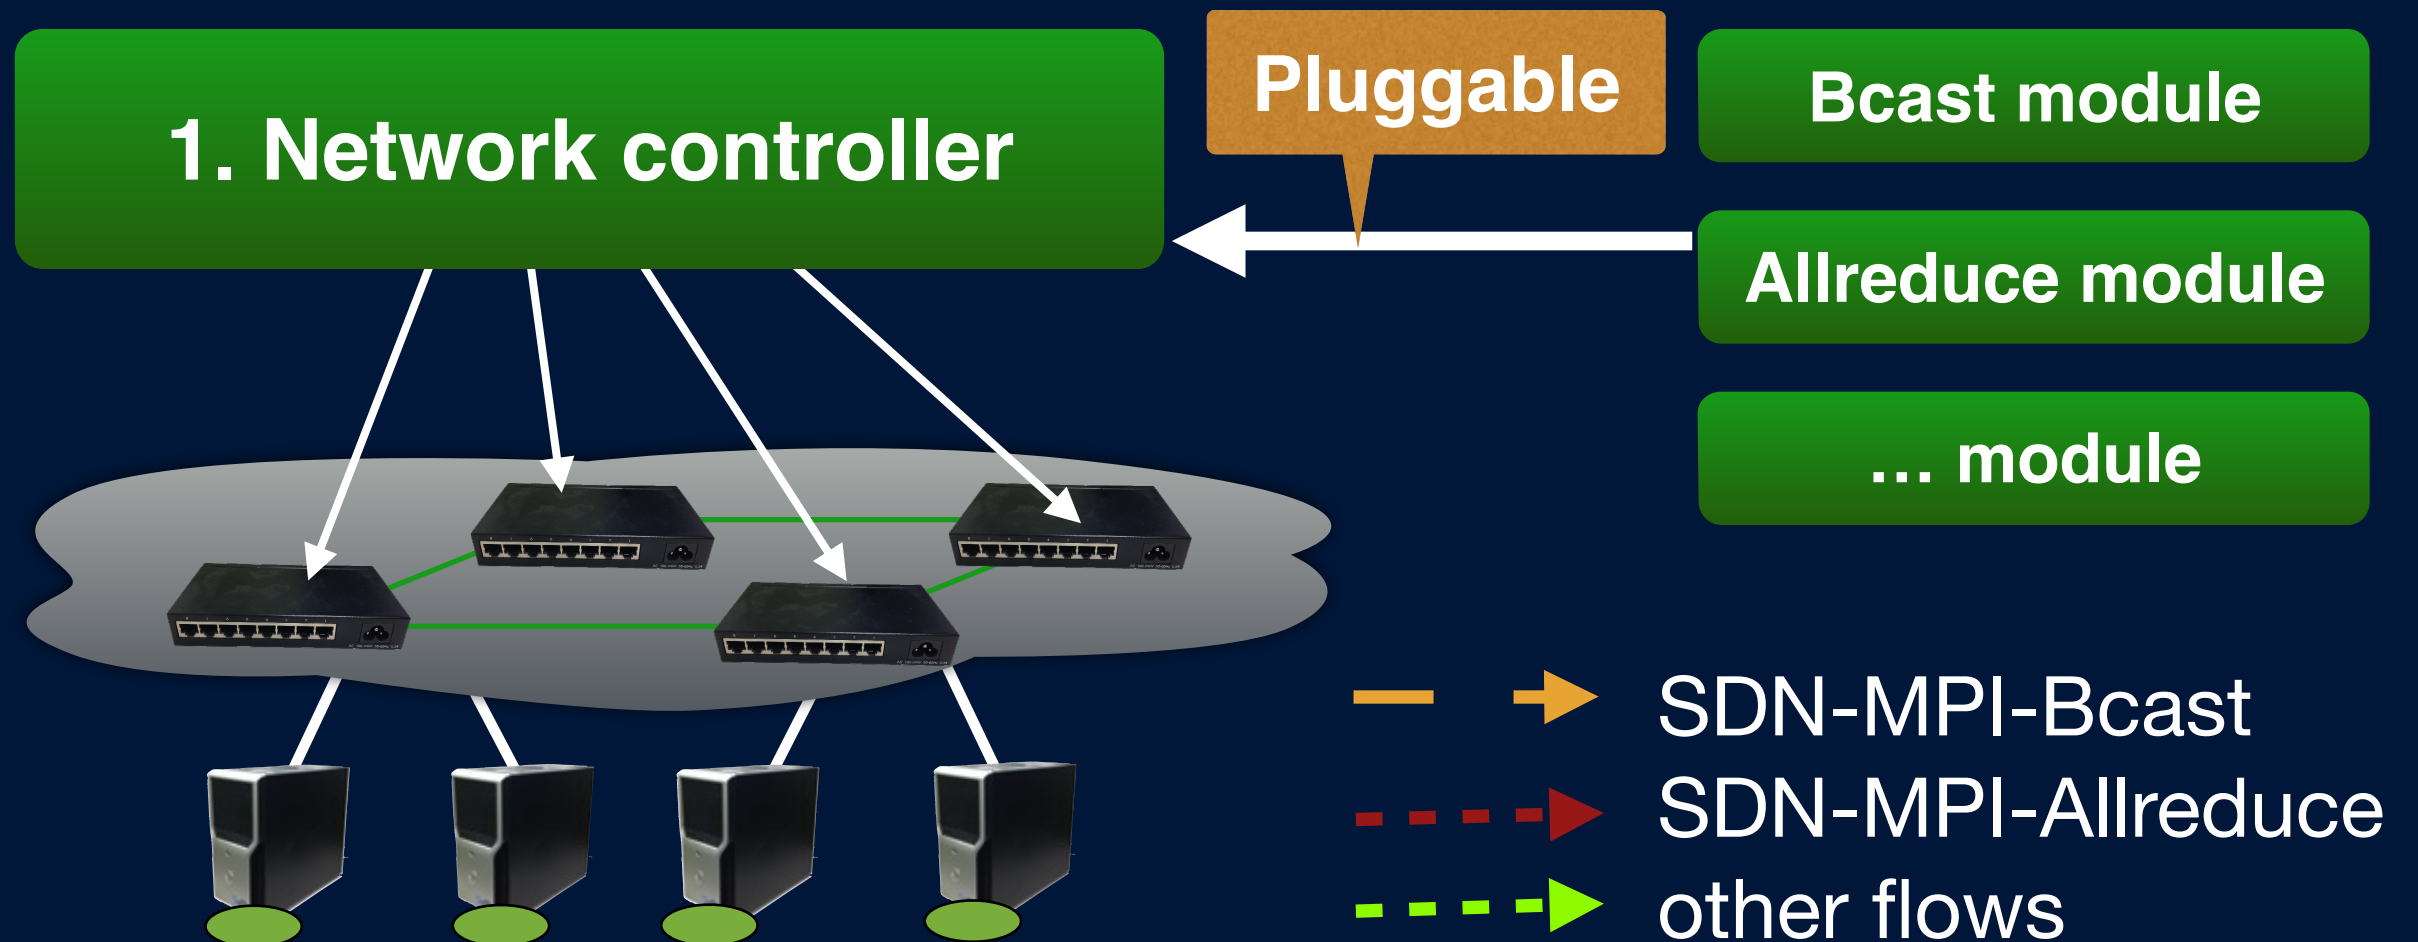

SDN MPI framework

- SDN MPI framework that includes previous work's methods and expendable for new boosting methods.

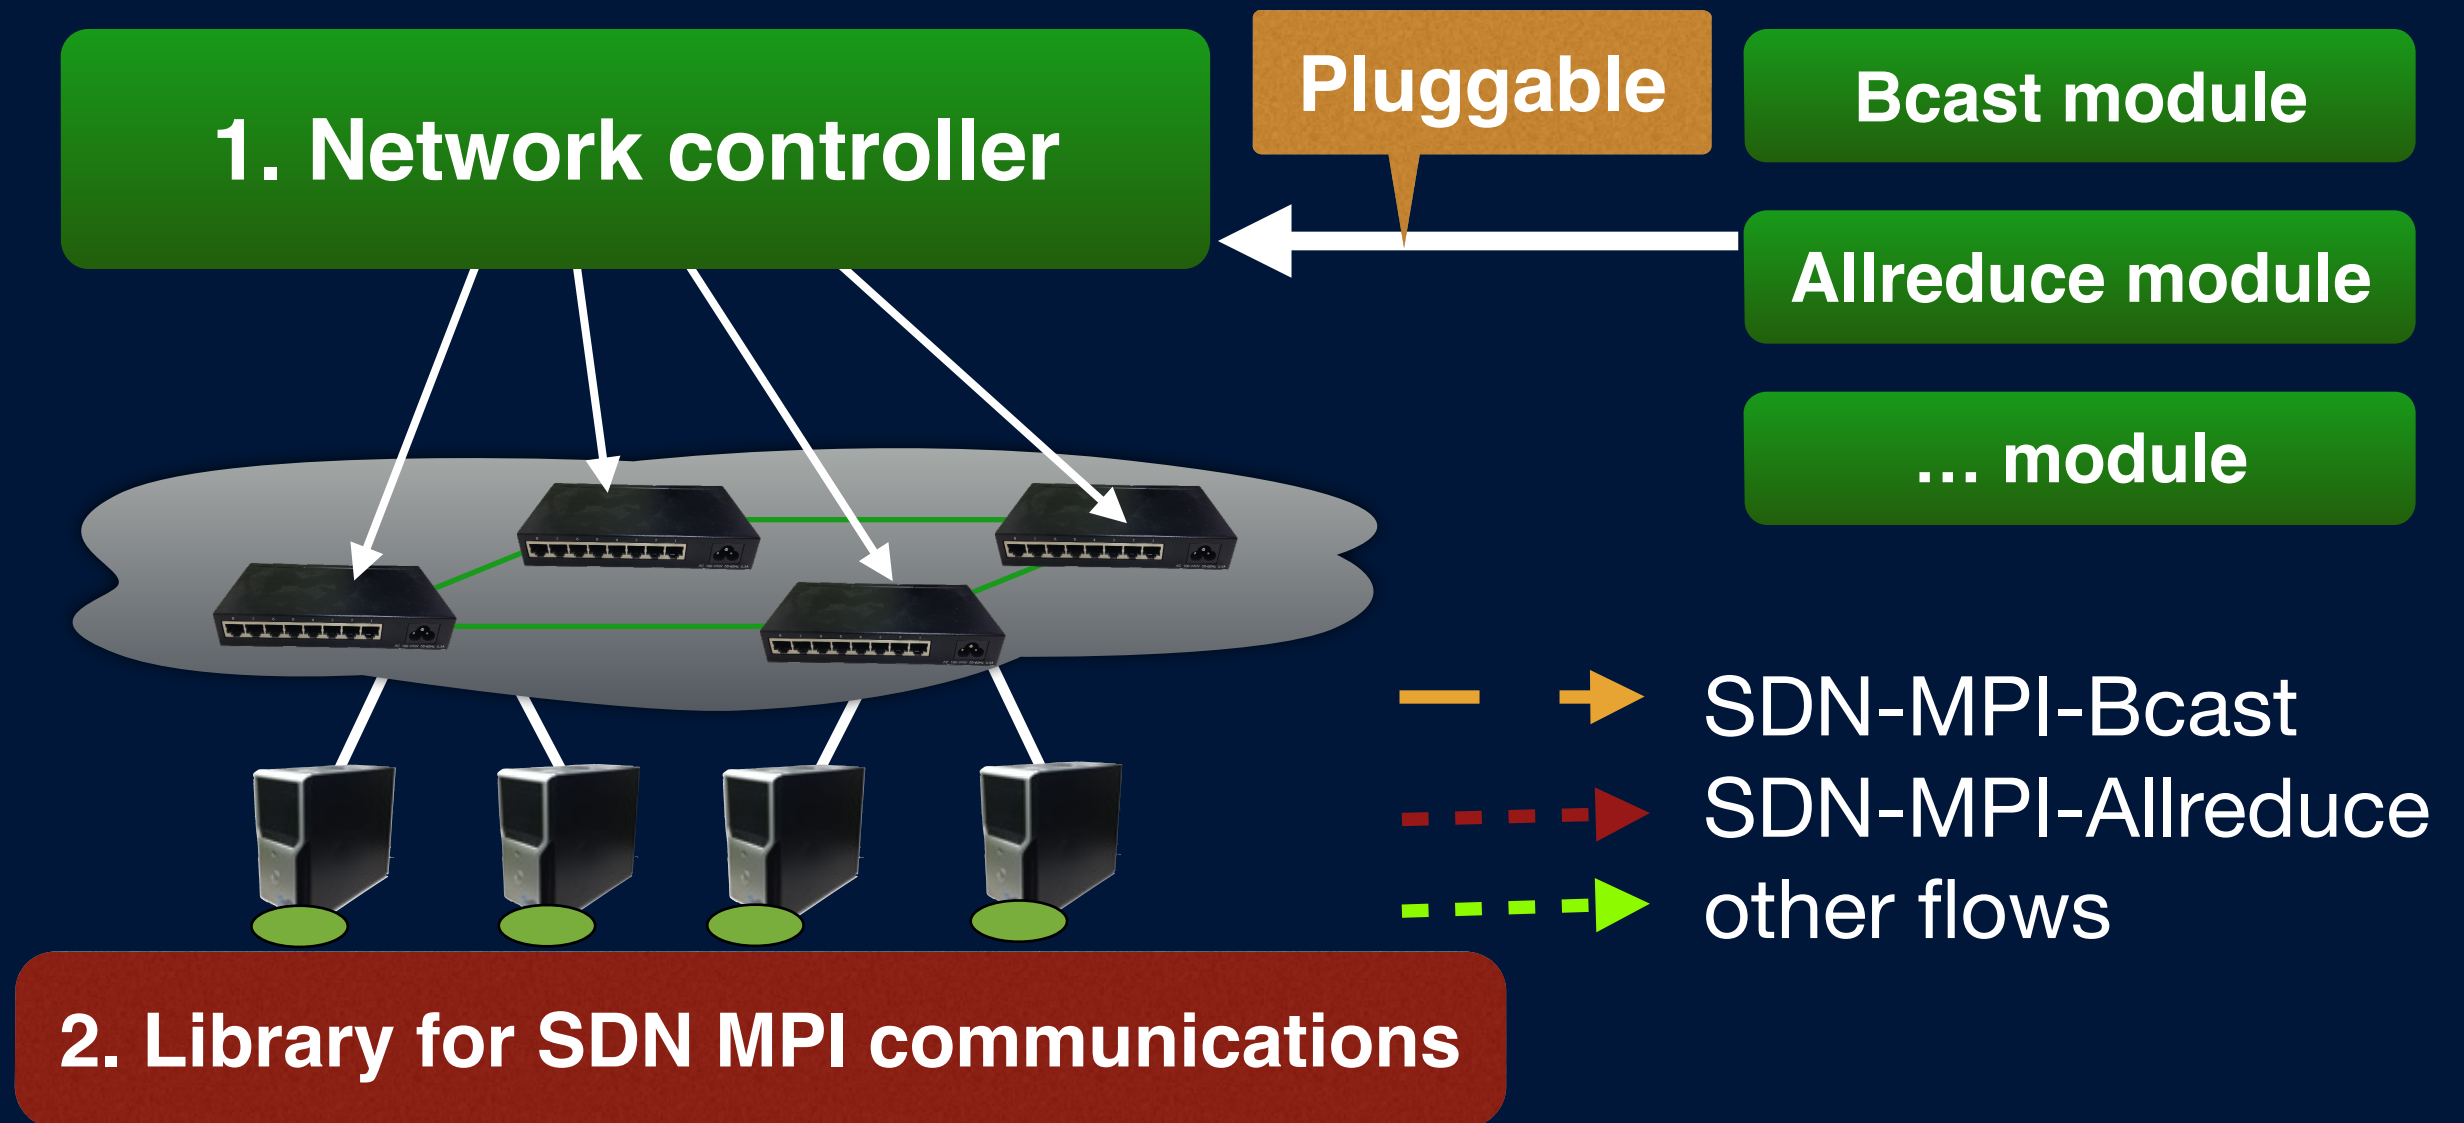

SDN MPI framework

- SDN MPI framework that includes previous work's methods and expendable for new boosting methods.

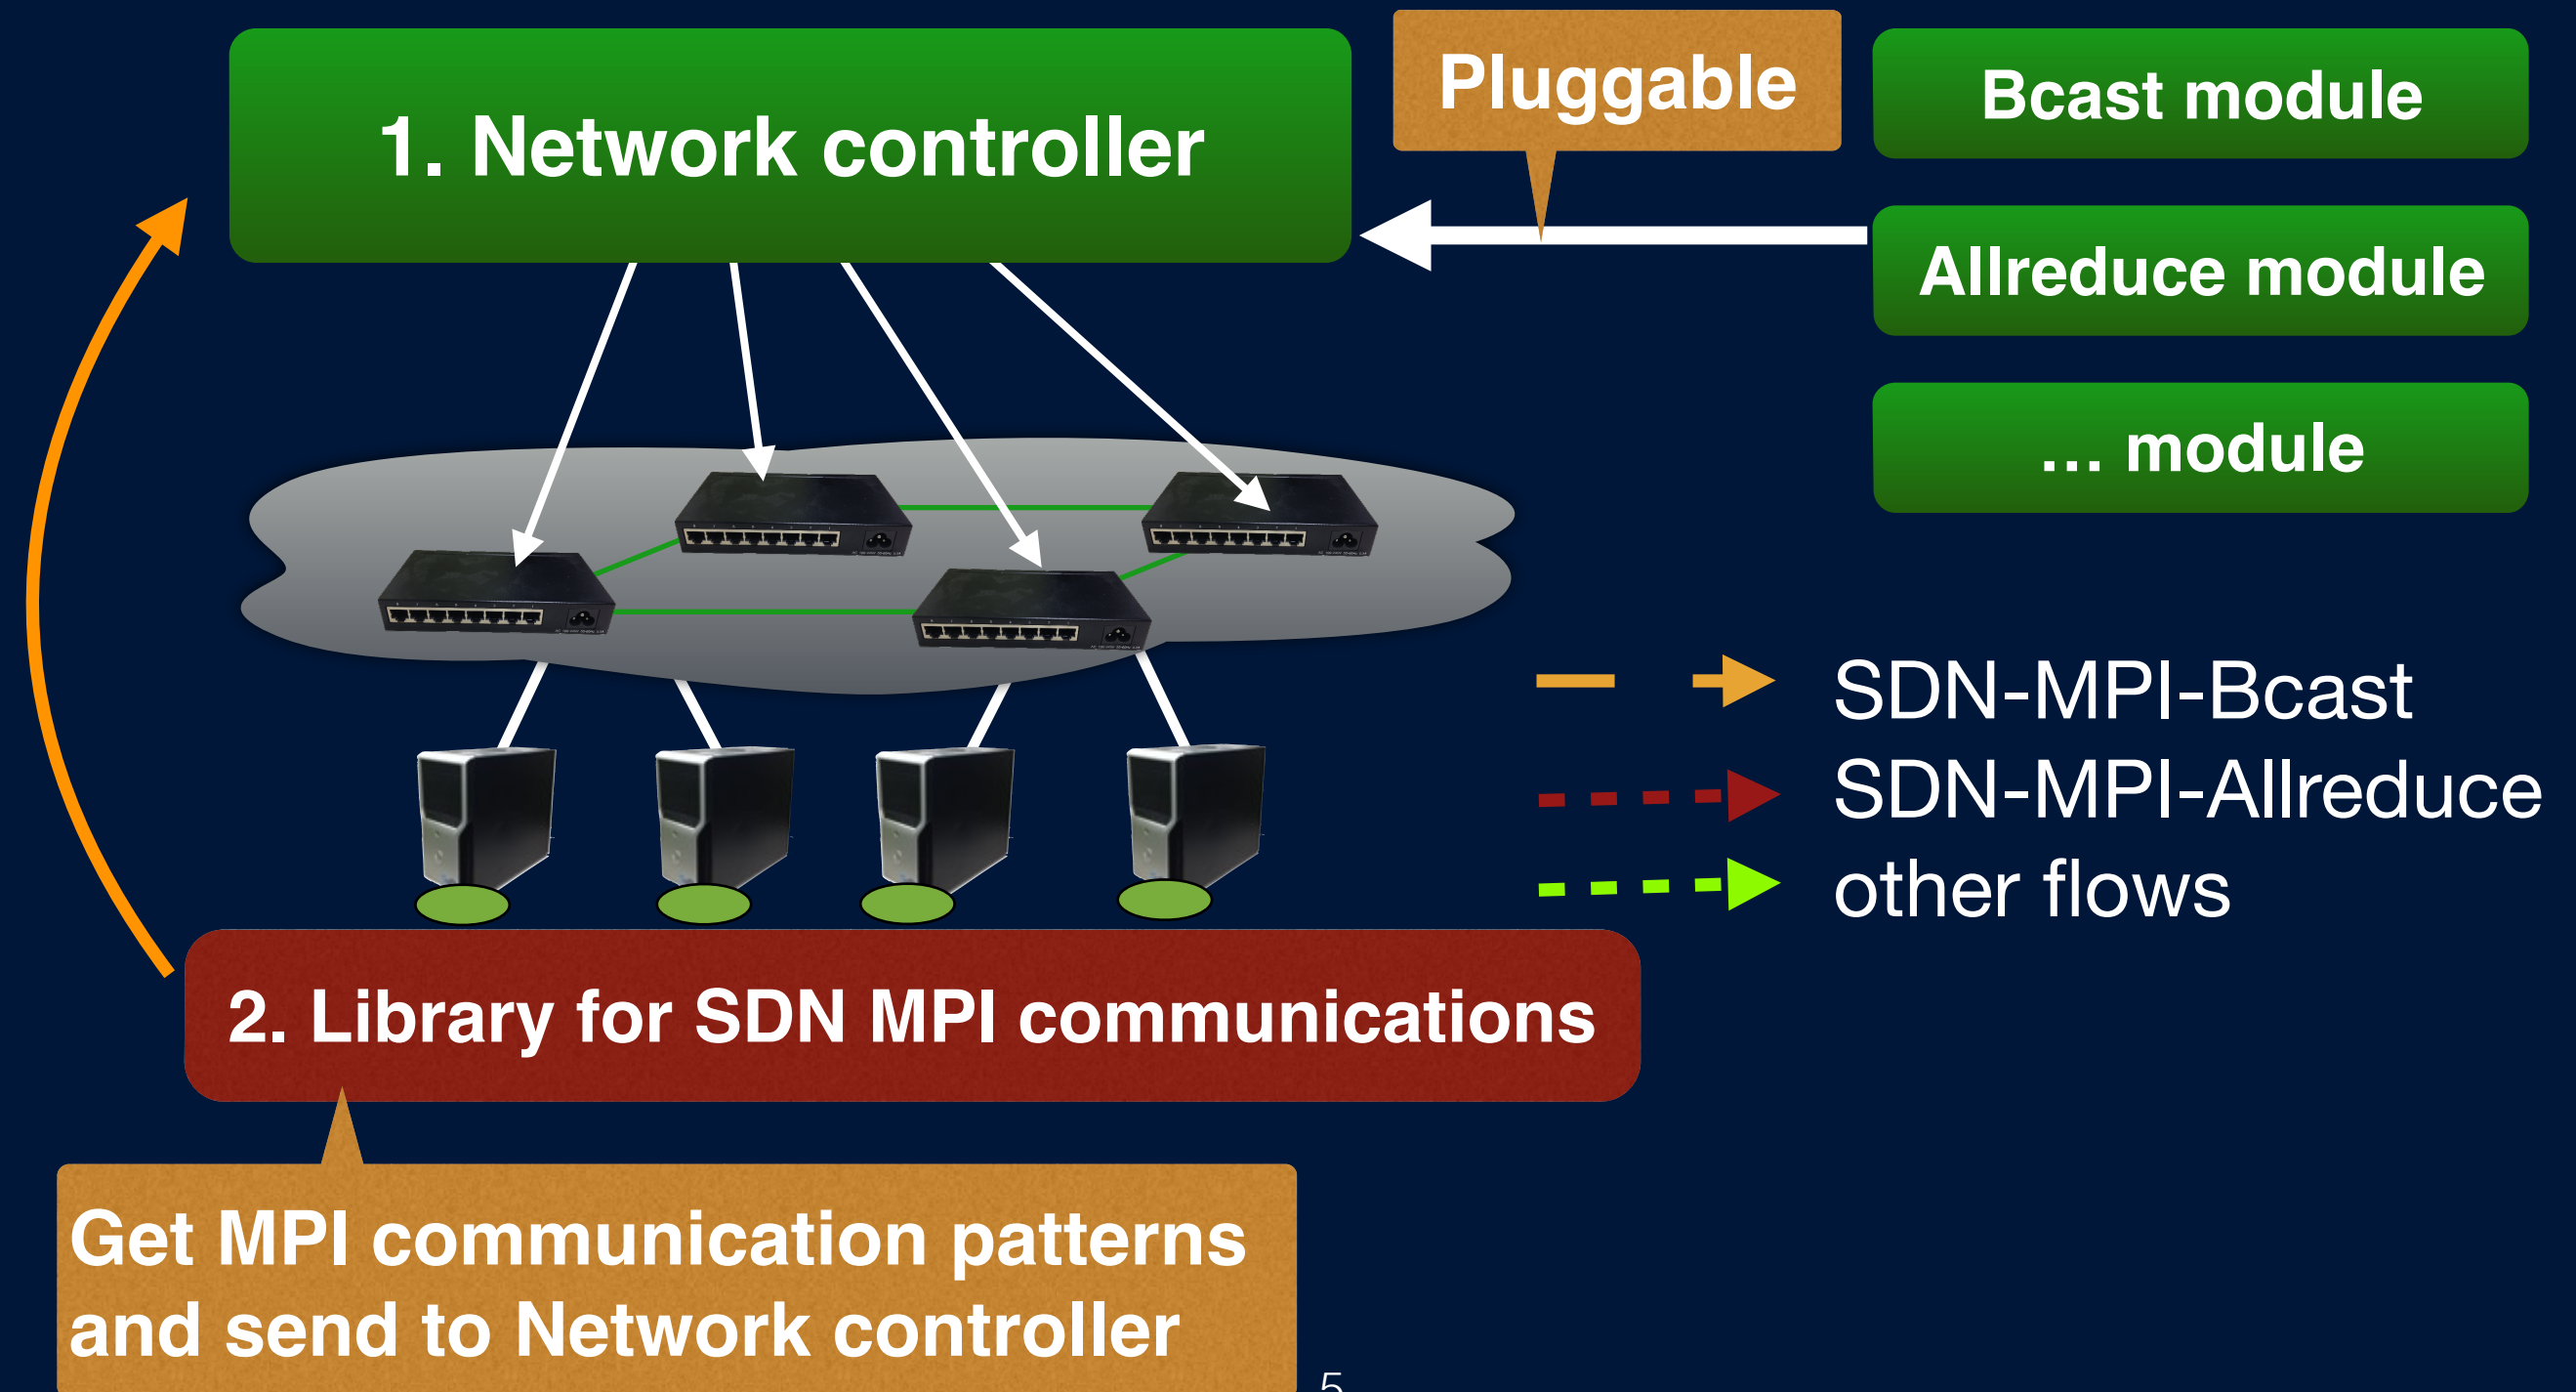

SDN MPI framework

- SDN MPI framework that includes previous work's methods and expendable for new boosting methods.

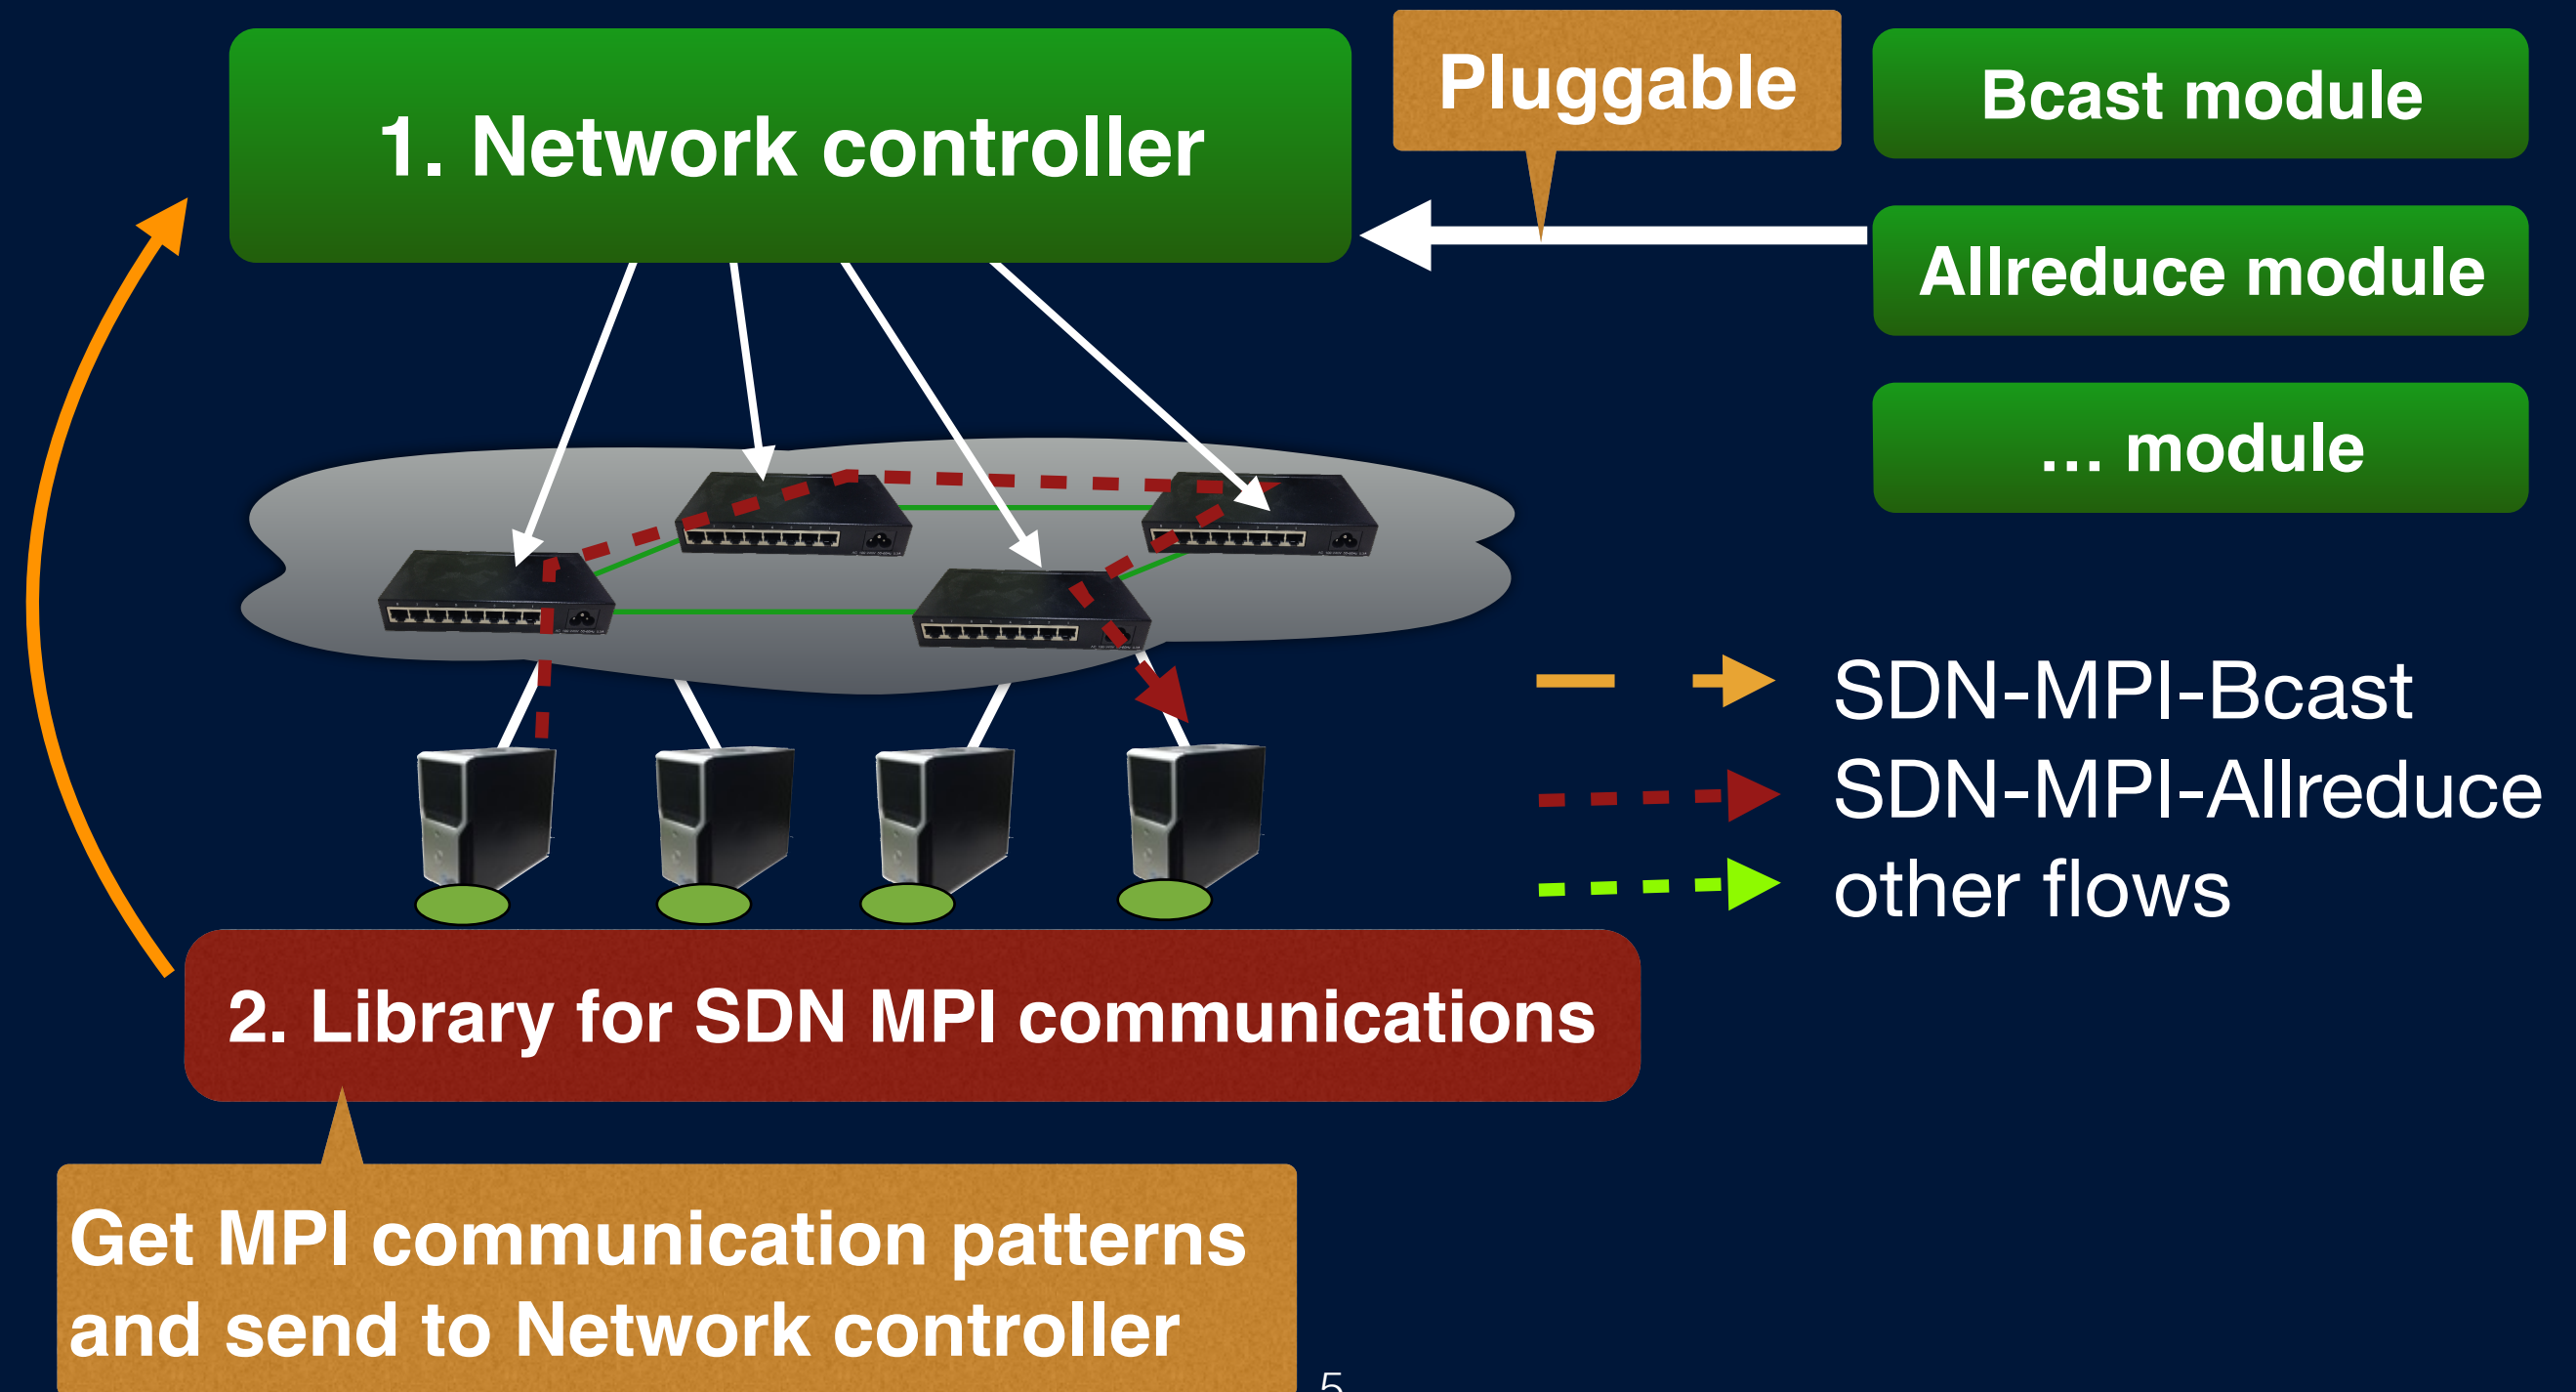

SDN MPI framework

- SDN MPI framework that includes previous work's methods and expendable for new boosting methods.

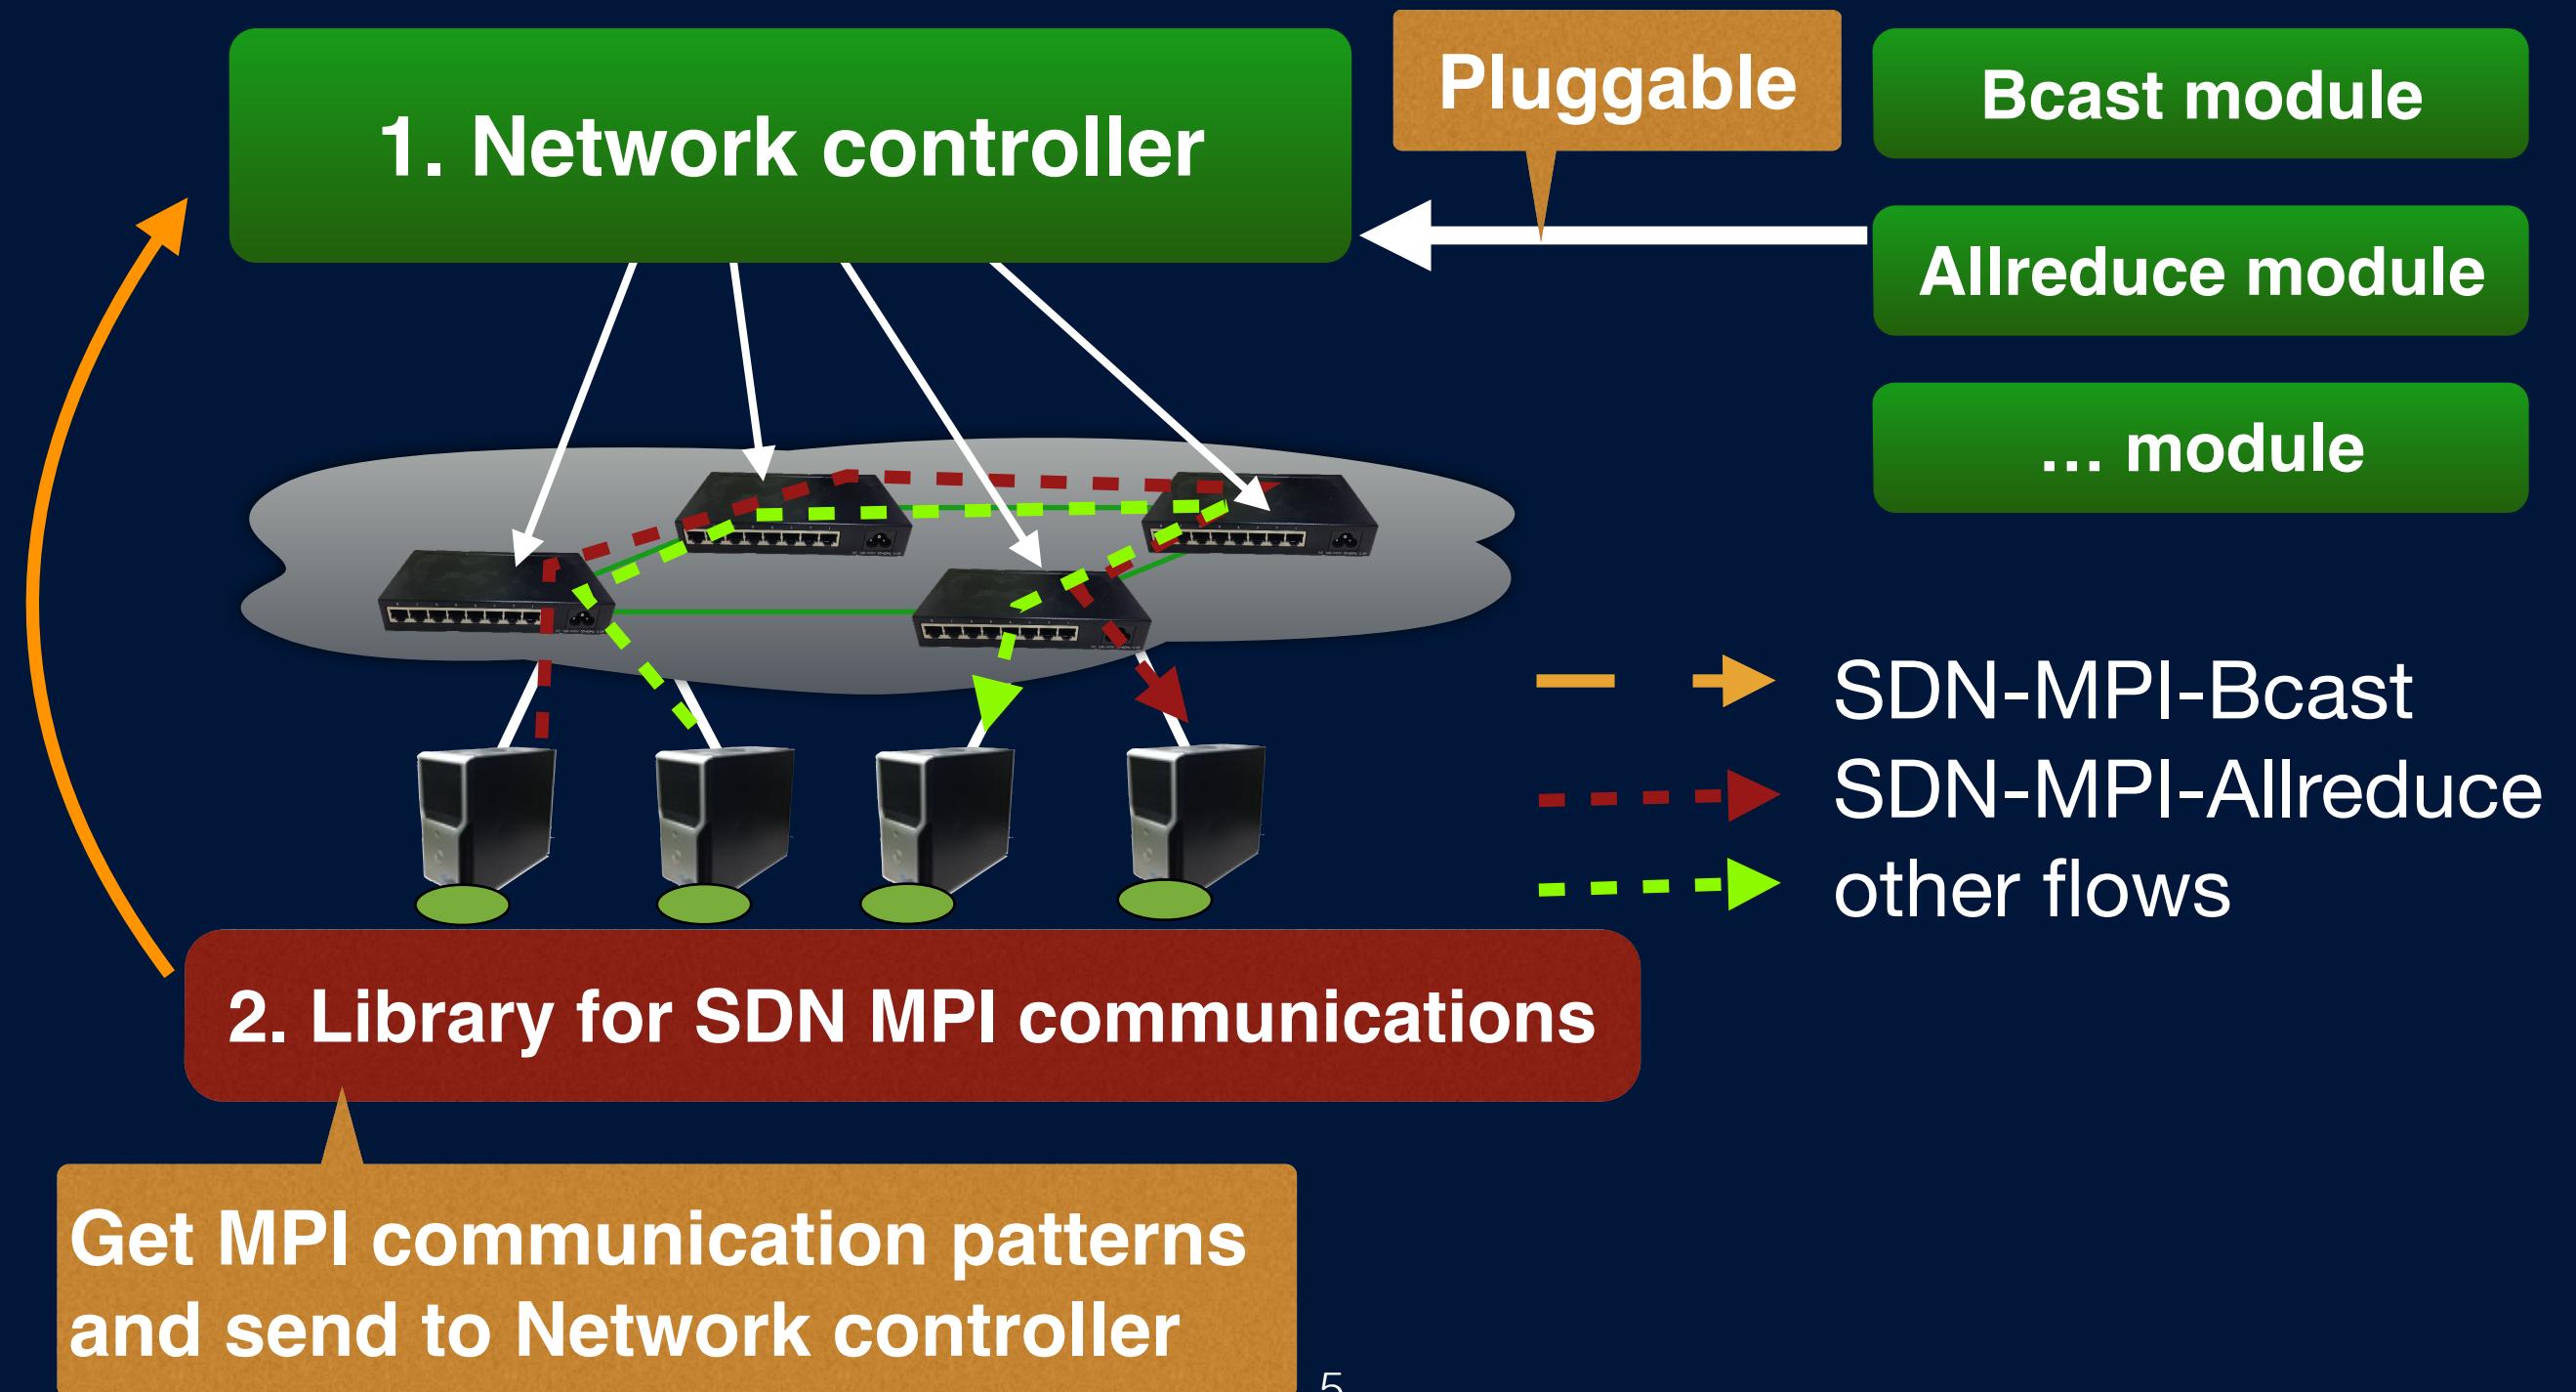

SDN MPI framework

- SDN MPI framework that includes previous work's methods and expendable for new boosting methods.

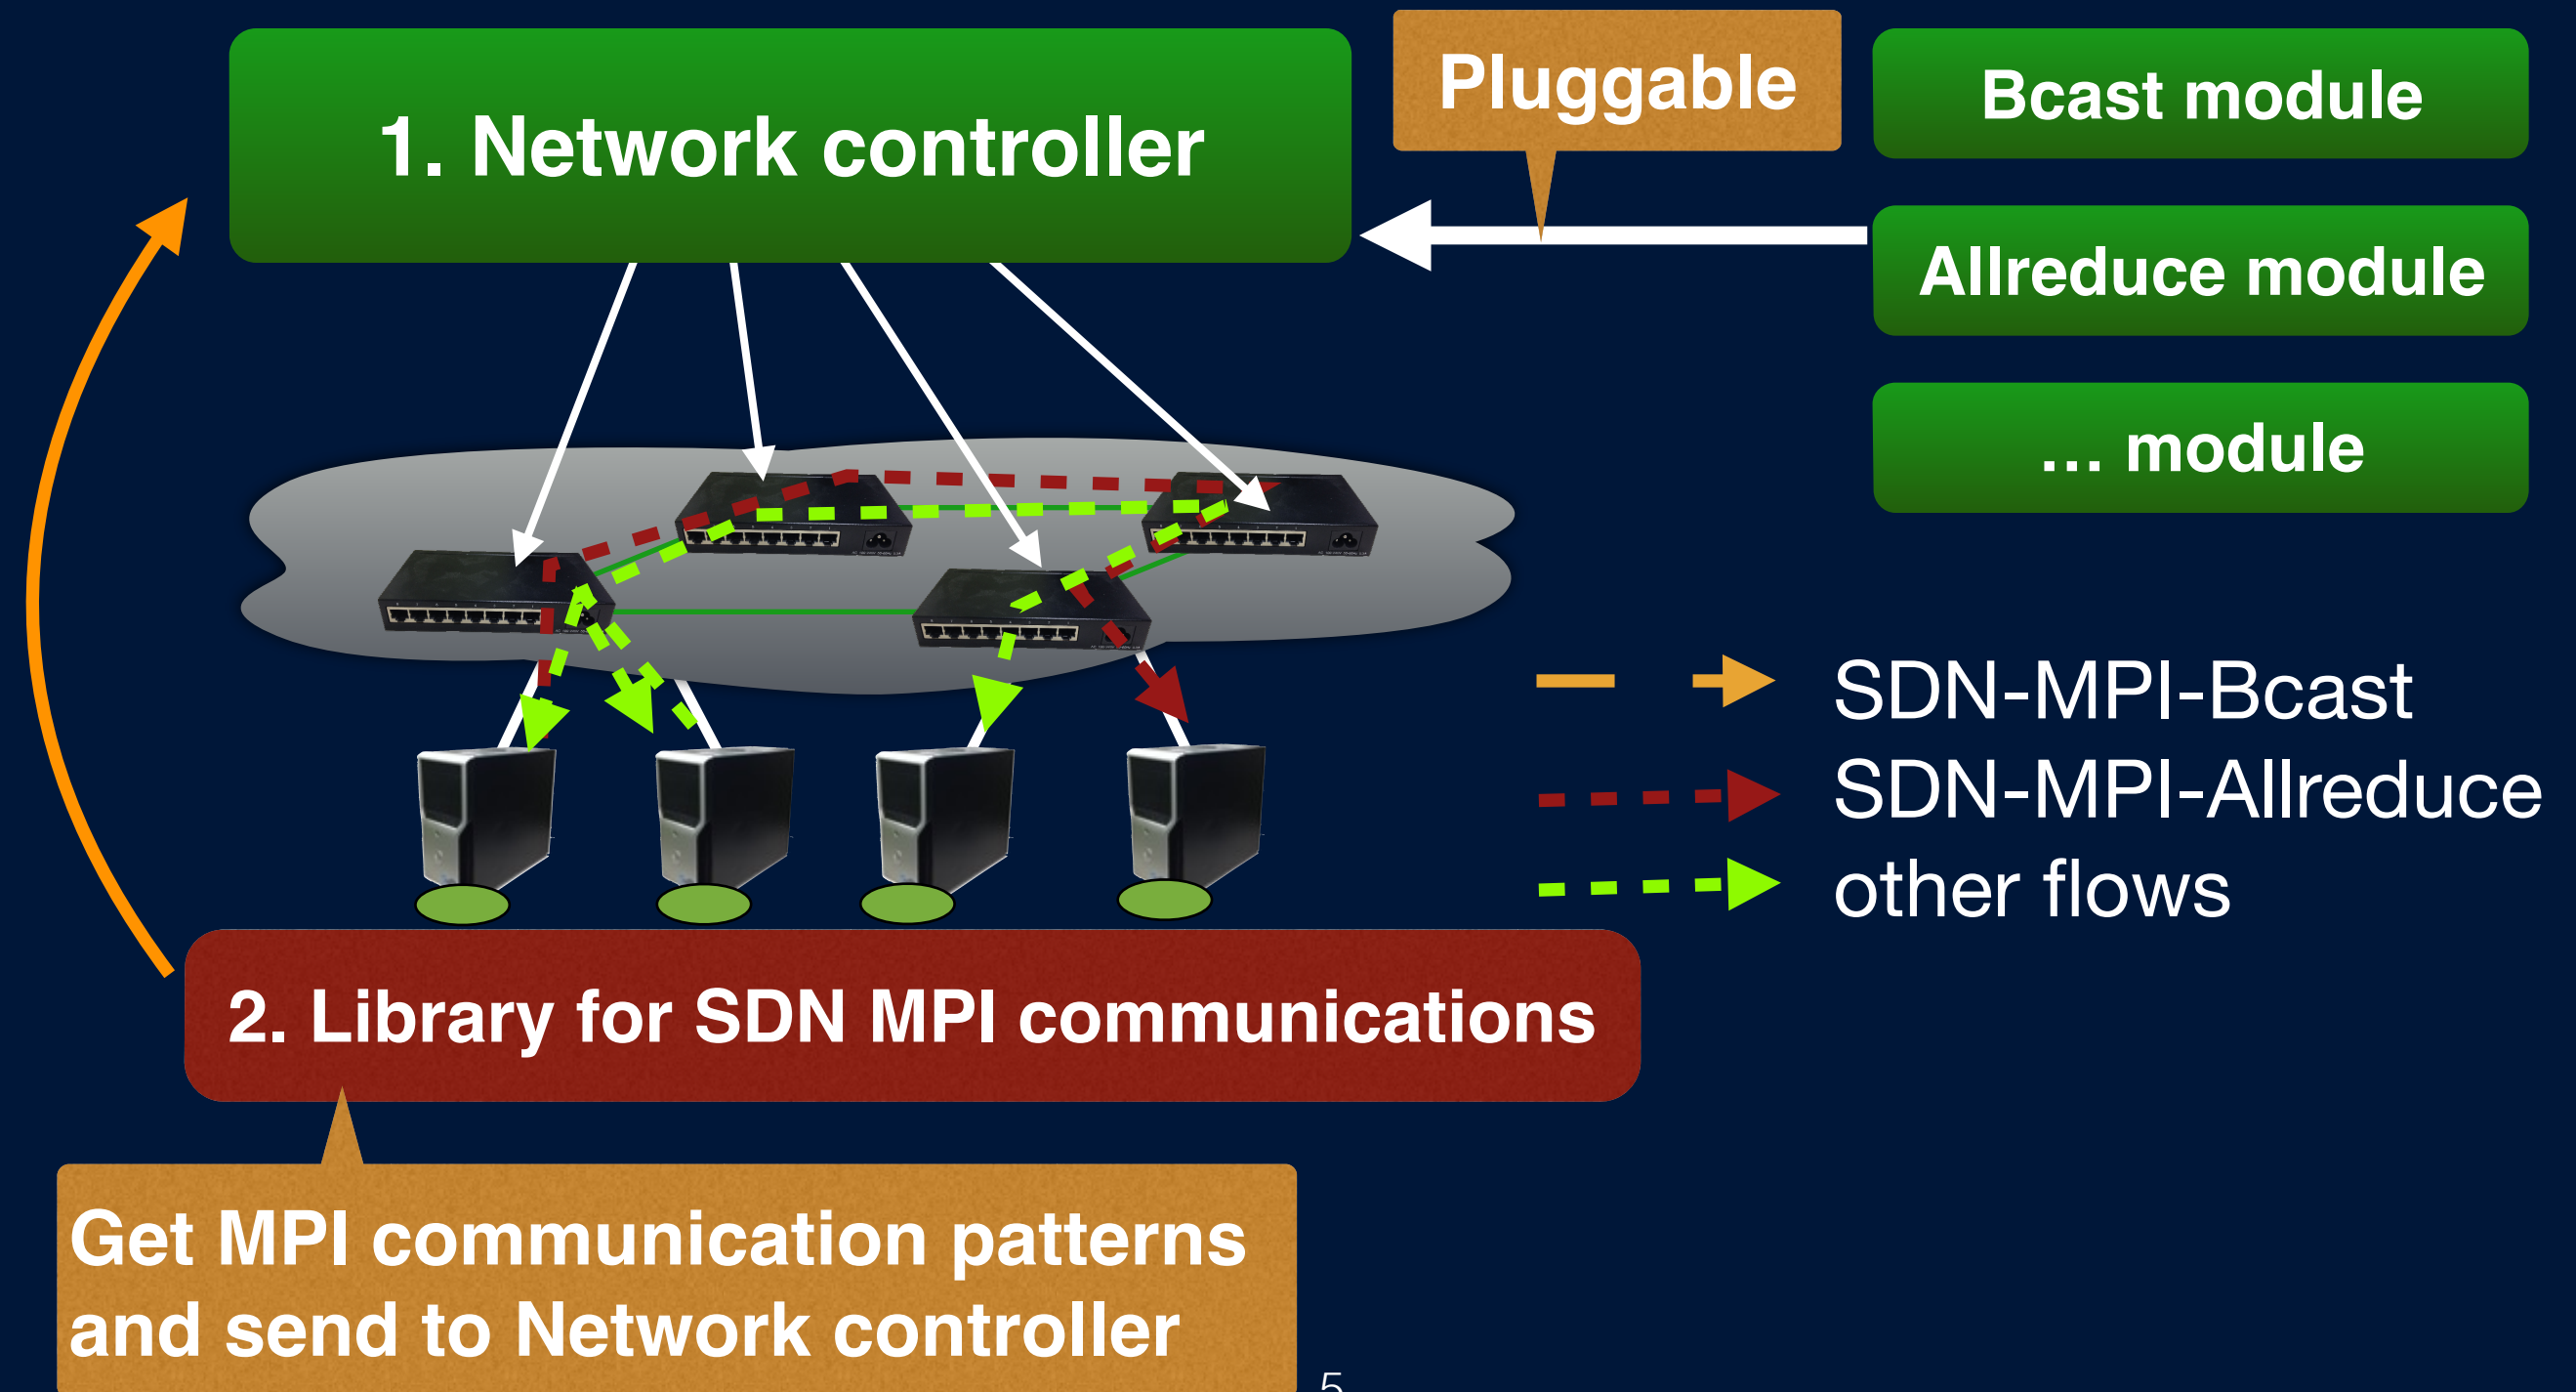

SDN MPI framework

- SDN MPI framework that includes previous work's methods and expendable for new boosting methods.

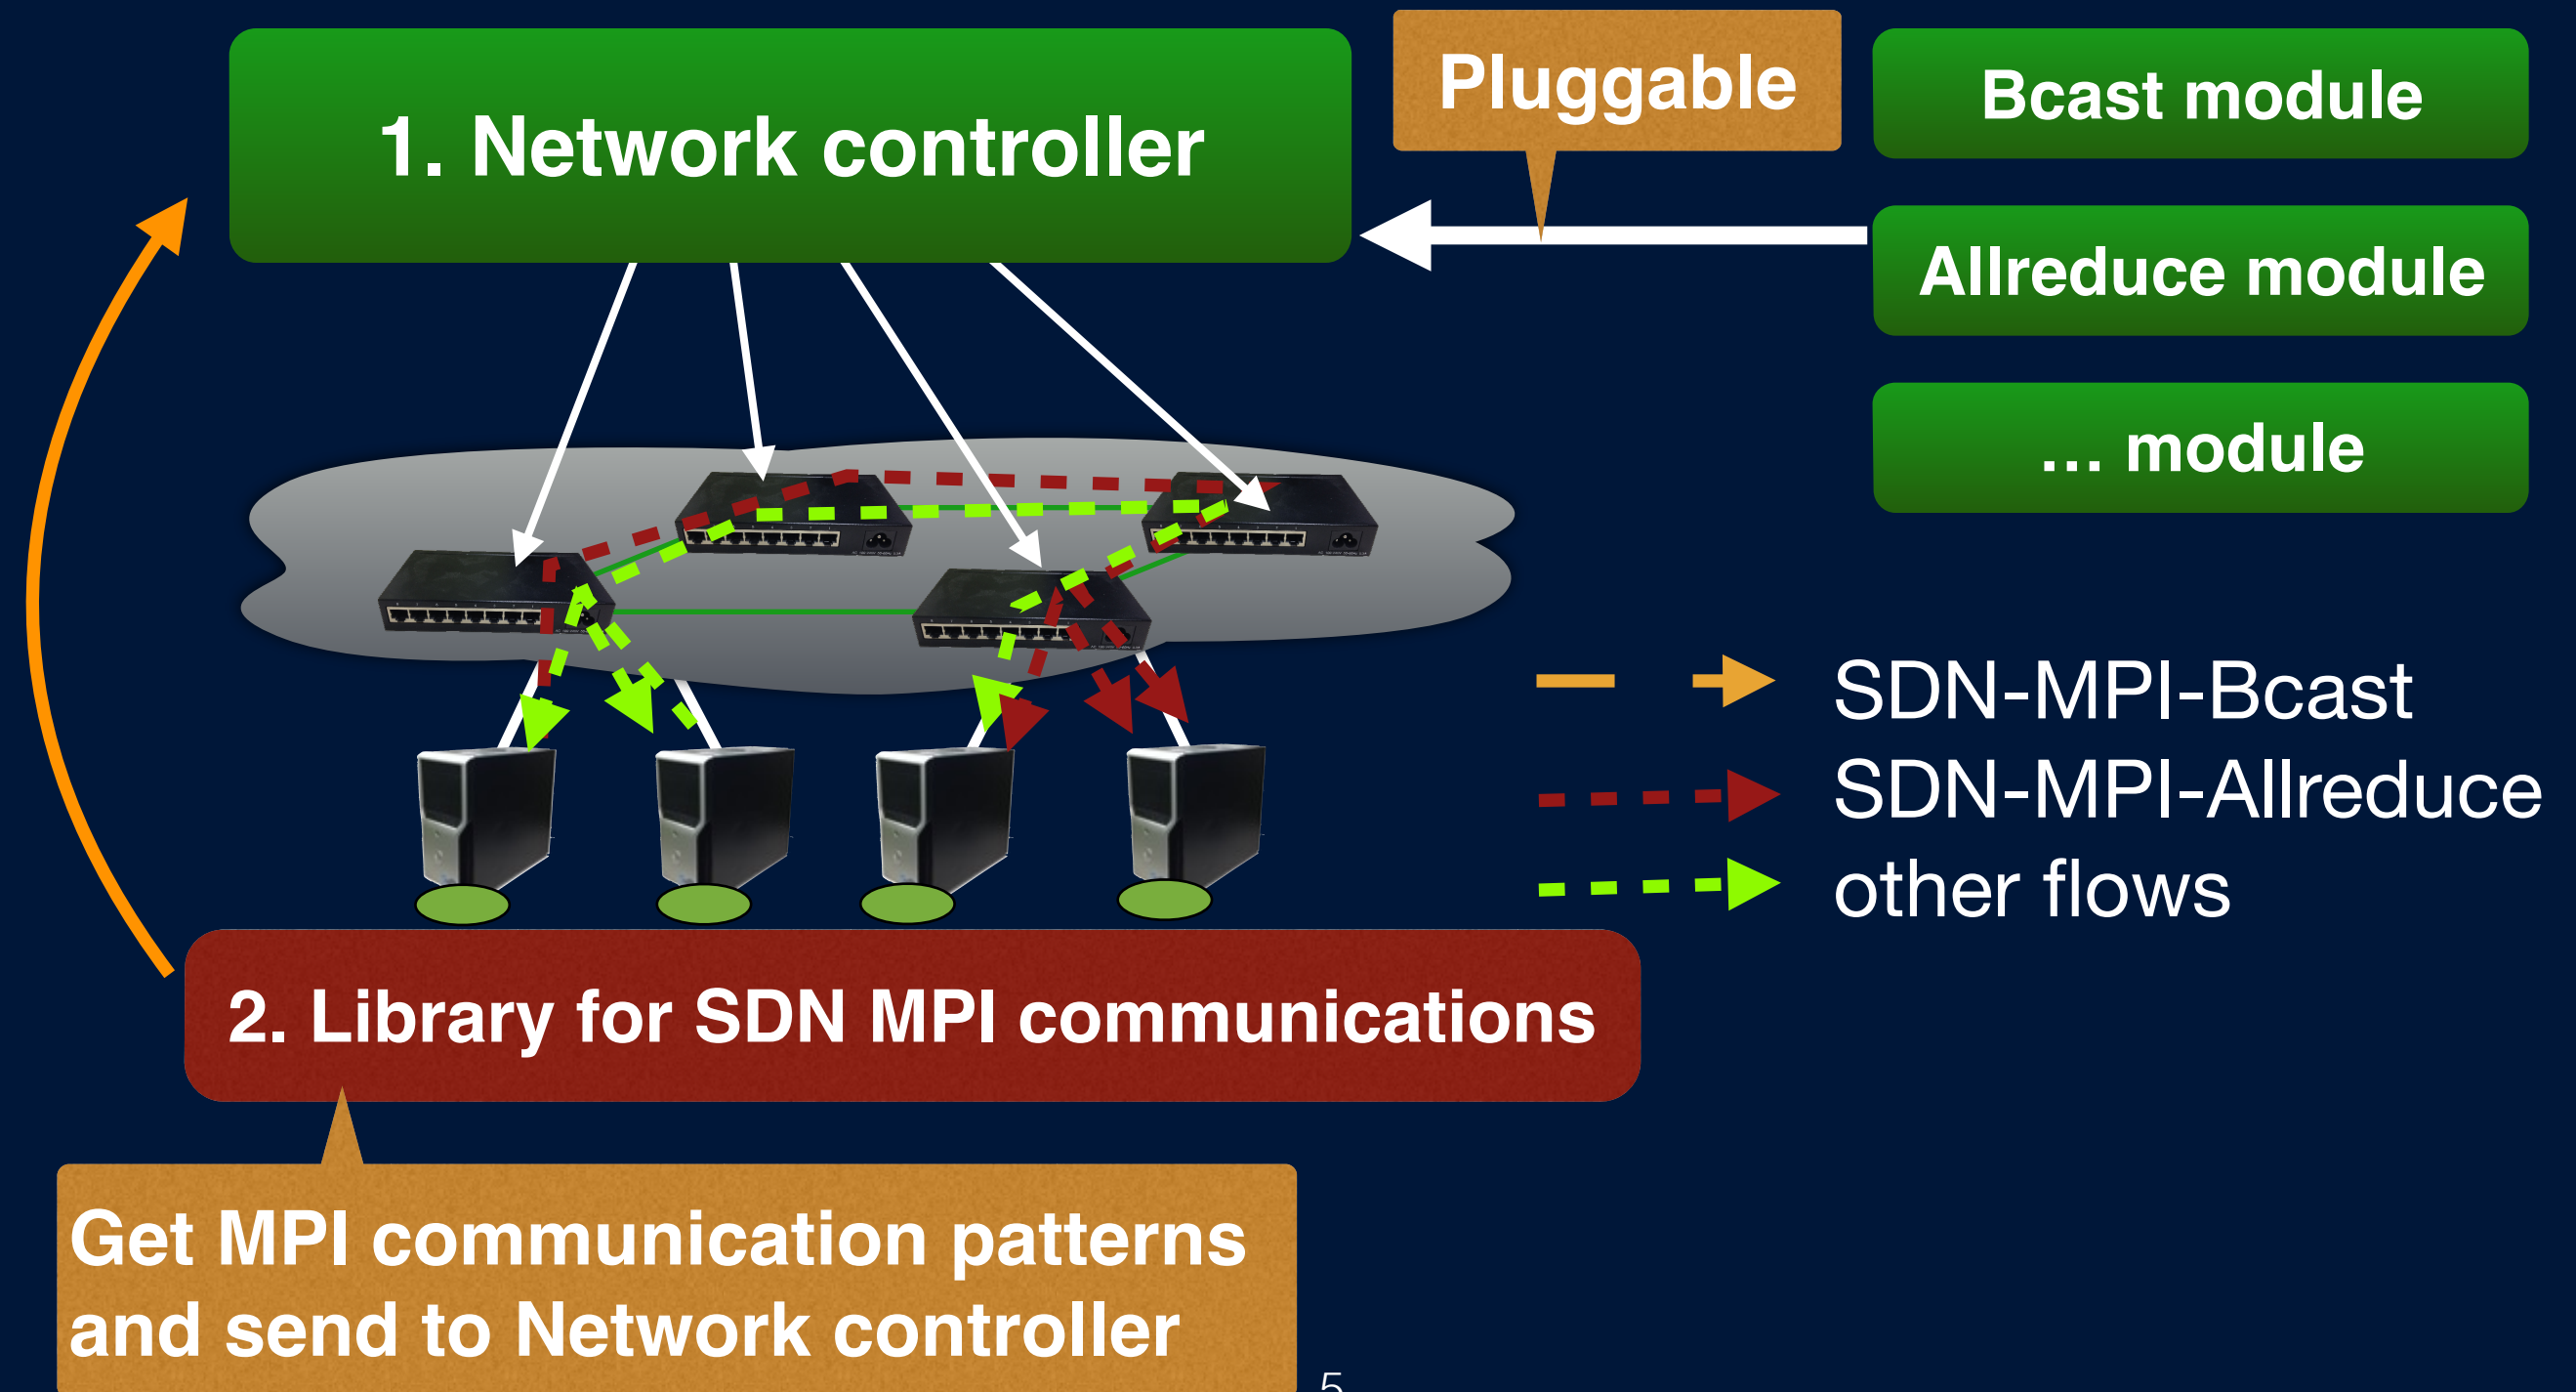

SDN MPI framework

- SDN MPI framework that includes previous work's methods and expendable for new boosting methods.

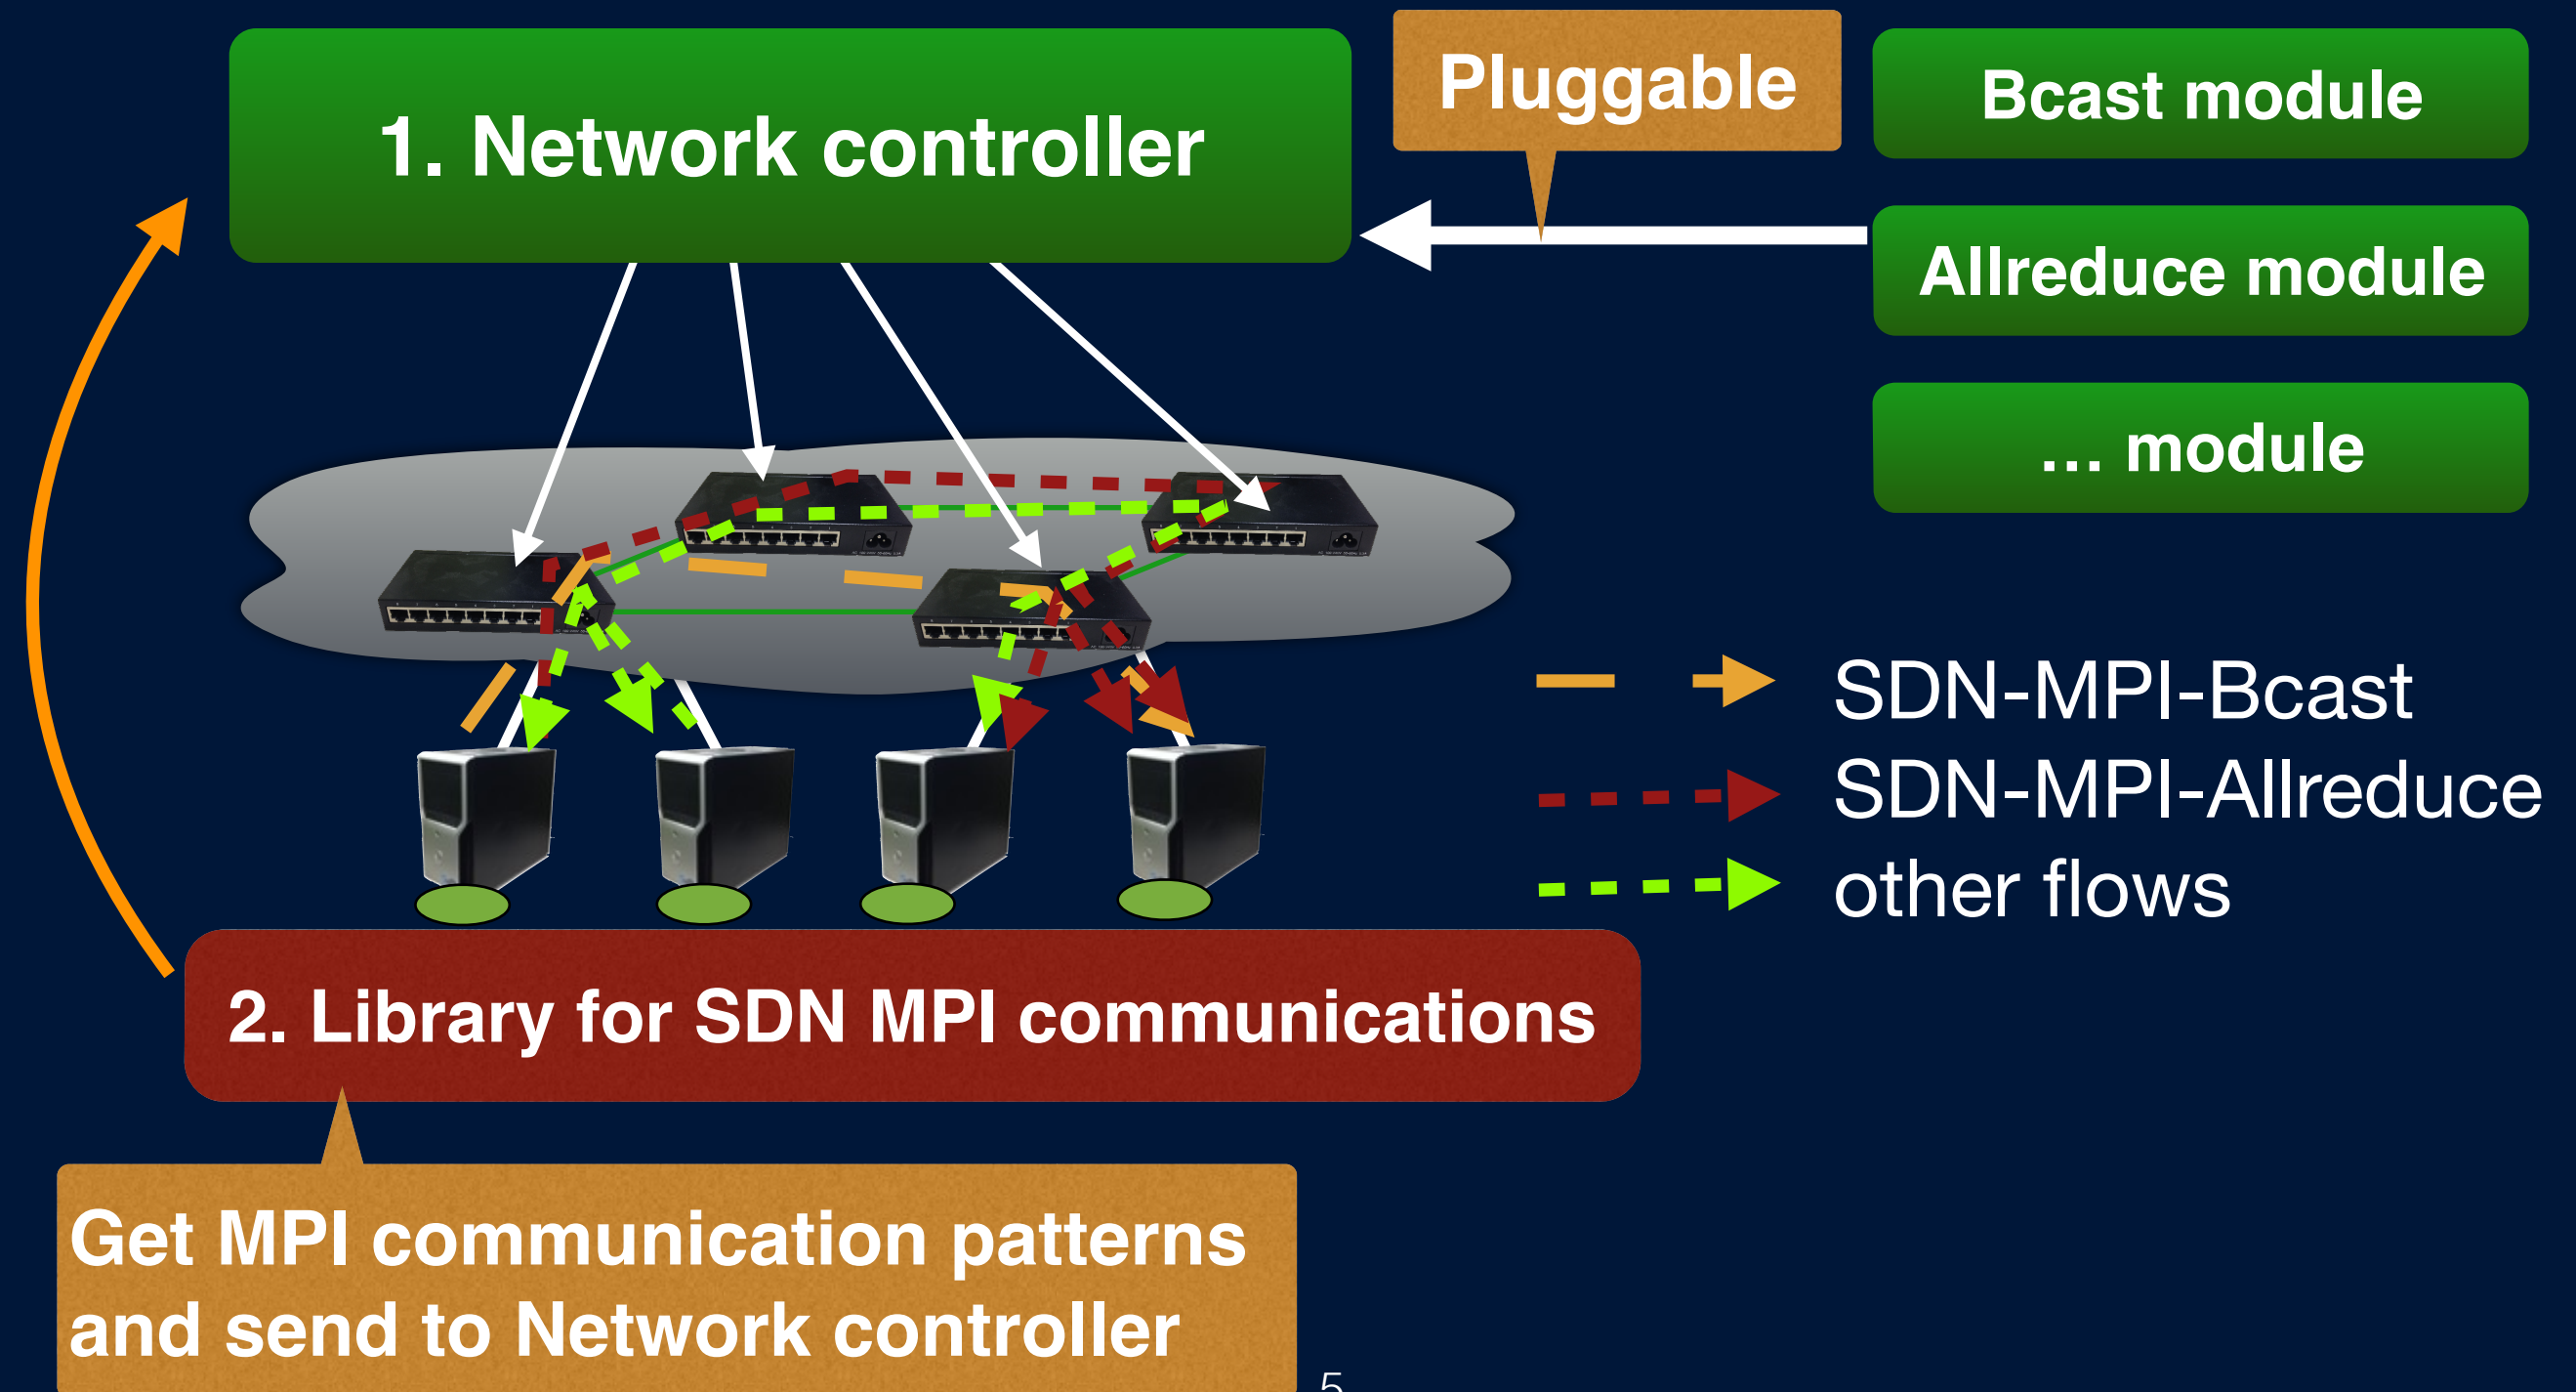

SDN MPI framework

- SDN MPI framework that includes previous work's methods and expendable for new boosting methods.

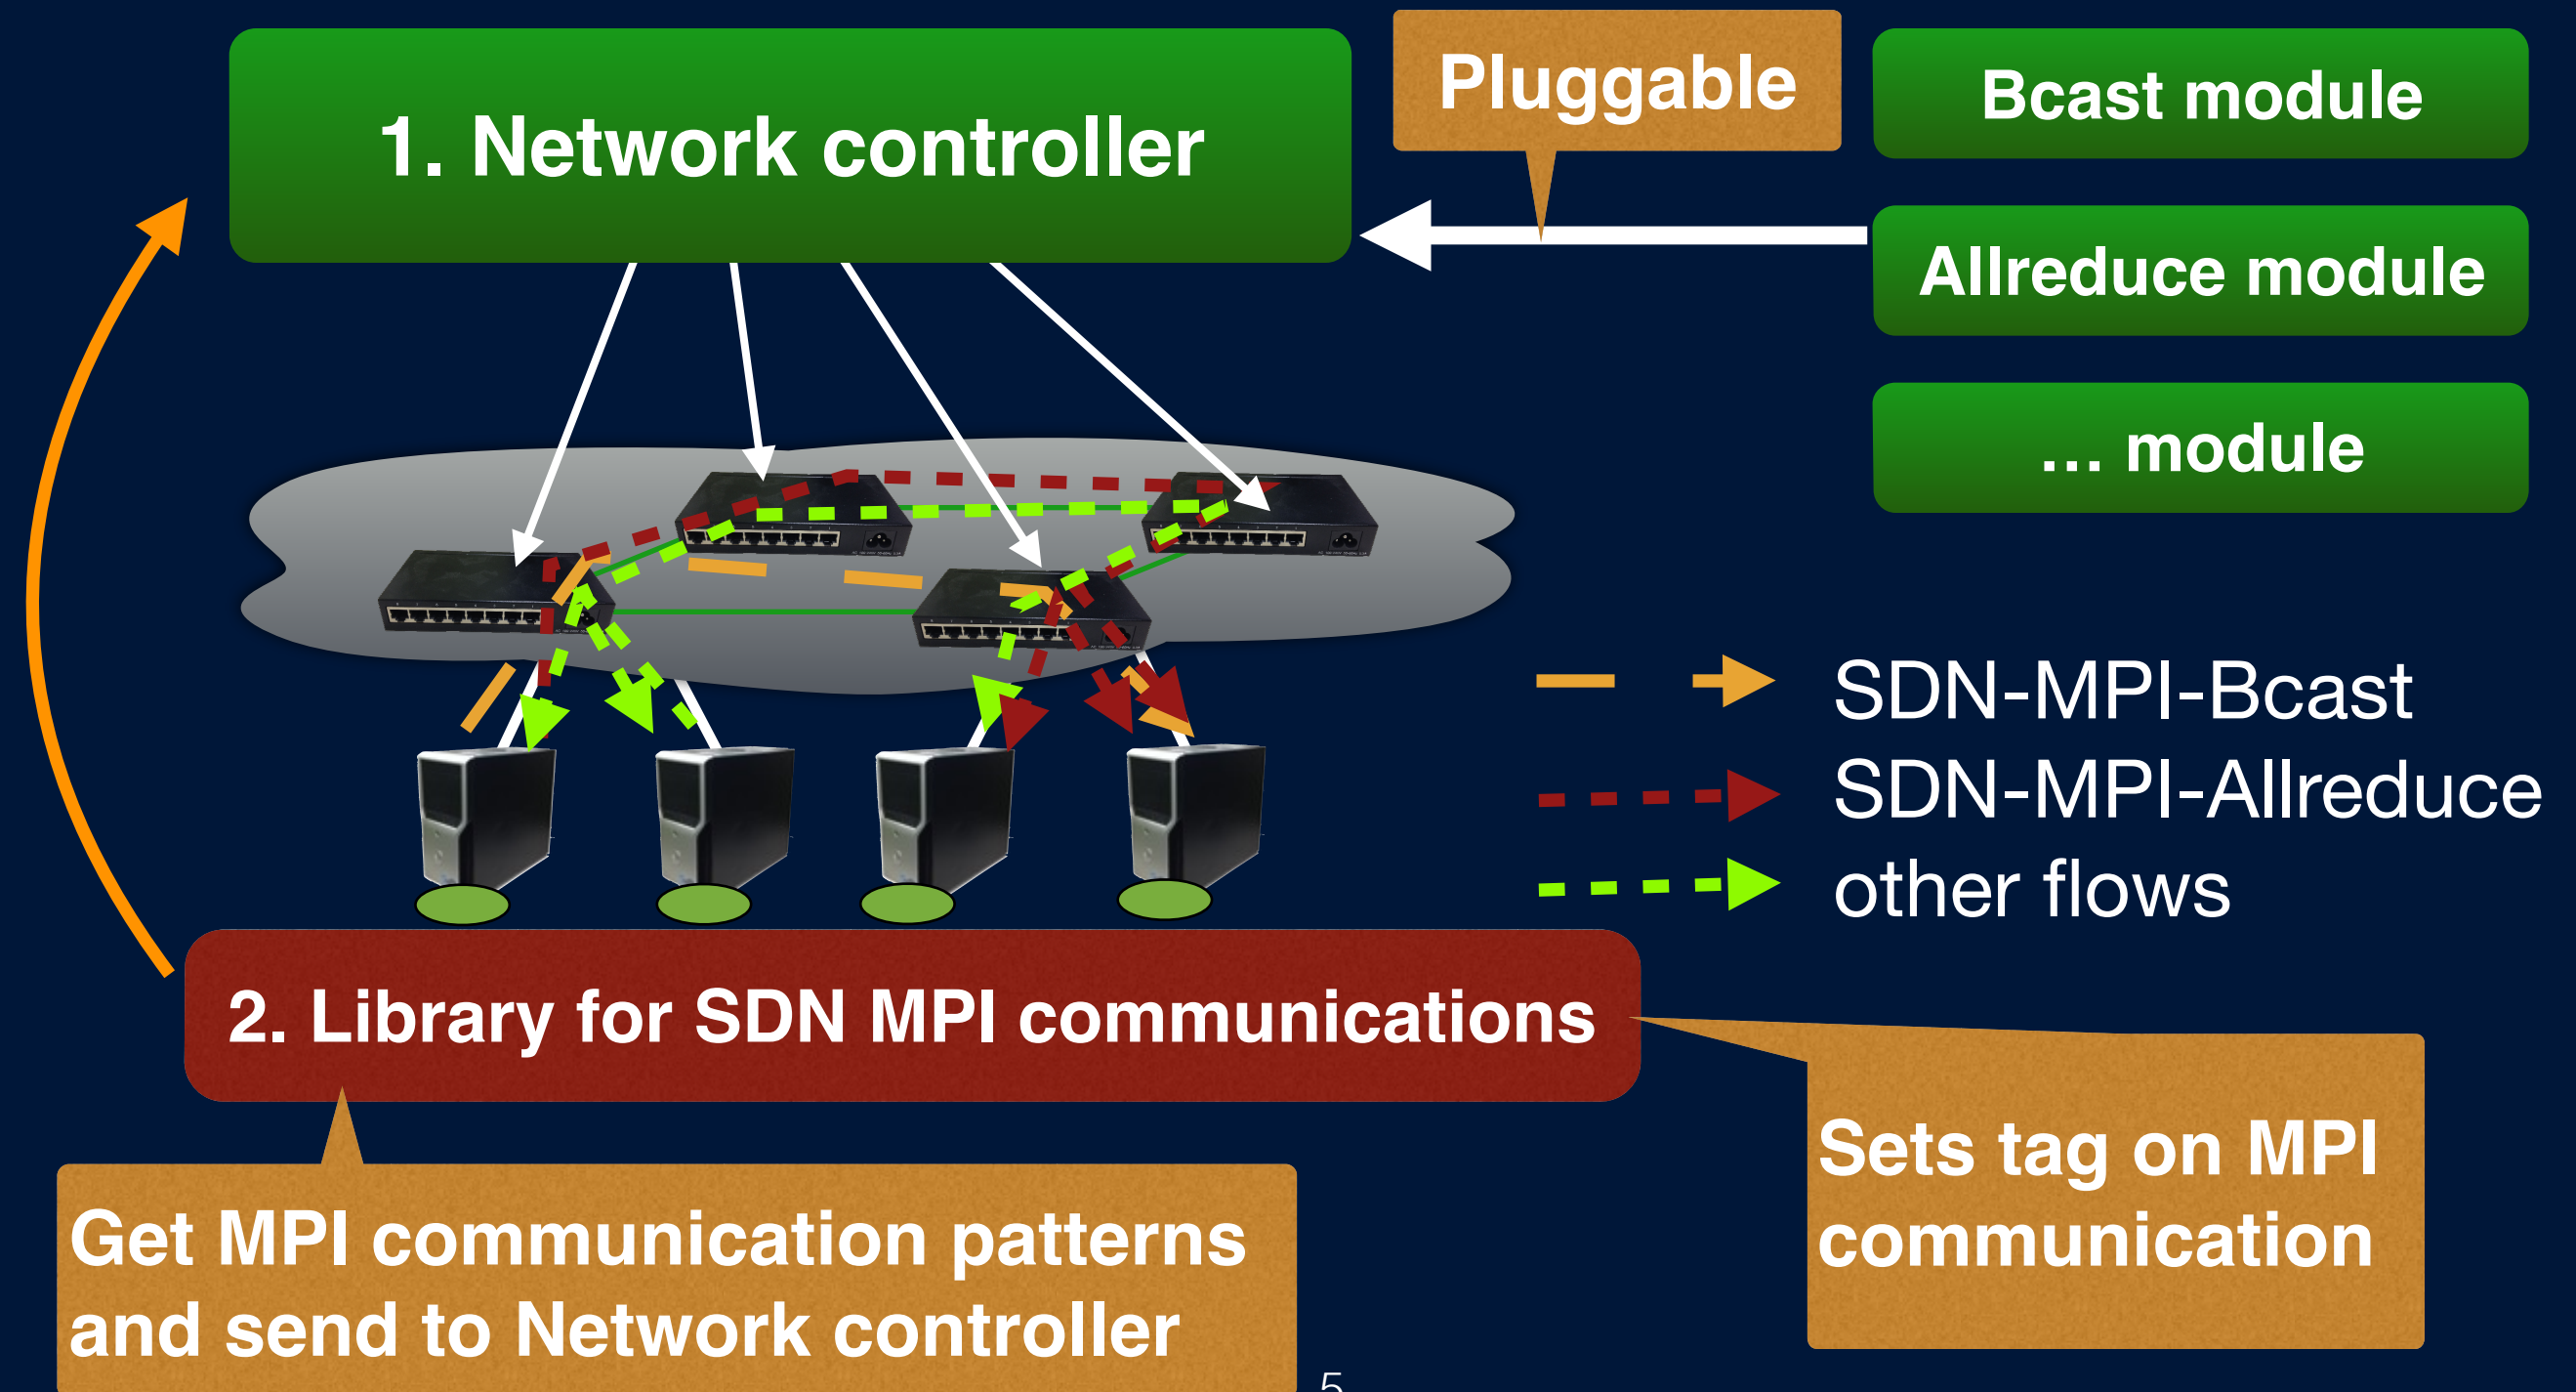

SDN MPI framework

- SDN MPI framework that includes previous work's methods and expendable for new boosting methods.

SDN MPI framework

- SDN MPI framework that includes previous work's methods and expendable for new boosting methods.

Conclusion

- Introduced general SDN MPI framework which is able to include previous works easily.
